

## QUESTIONS & ANSWERS #2

### RFP – Professional Engineering Design & Environmental Services

Q.2.1. What is your expectation with regard to level of effort needed to navigate CEQA for this project?

A.2.1. The City suspects that Task 2.0.1 (CEQA services for the entire project except for the proposed sidewalk along Fishback Road between Thomas Street and Wawona Street) will qualify under a Notice of Exemption.

Under Task 2.0.2, the selected consultant will coordinate with property owners for a potential right-of-way acquisition for the installation of the sidewalk along Fishback Road, and may require additional CEQA services to perform all technical studies necessary to comply with all CEQA clearance requirements. City expects Consultant to have sufficient experience to provide a cost based on their professional judgement.

The City will support with the coordination with the property owners.

Q.2.2. Can you please confirm that the budget listed includes construction costs?

A.2.2. Yes, it includes the construction cost.

\$ 1,500,000 in Measure K Funding has been secured to pay for engineering design, environmental services, construction, construction management, and construction support.

Q.2.3. What is your expectation with regard to Caltrans coordination, review and approval?

A.2.3. There will be no Caltrans coordination for this project.
