CEQA EXEMPTION / NEPA CATEGORICAL EXCLUSION DETERMINATION FORM (rev. 06/2022)

Project Information

Project Name (if applicable): Yosemite Ave. Bike and Ped Facilities

DIST-CO-RTE: 10-City of Manteca **PM/PM:** N/A

EA: N/A **Federal-Aid Project Number:** HSIPL-5242(036)

Project Description

The City of Manteca, in coordination with the California Department of Transportation (Caltrans), proposes to improve safety for pedestrians and bicyclists on Yosemite Avenue from Walnut Ave. to Main St. The scope of work includes installing Class II bike lanes and enhancing pedestrian crossings with improved curb ramps. All work will occur on the City of Manteca's Right of Way. The purpose of the project is to address the current lack of safe and accessible Bicycle and Pedestrian facilities on Yosemite Avenue. The project is needed to provide Bicycle and Pedestrian Safety.

Caltrans CEQA Determination (Check one)

☒ **Not Applicable** – Caltrans is not the CEQA Lead Agency

☐ **Not Applicable** – Caltrans has prepared an IS or EIR under CEQA

Based on an examination of this proposal and supporting information, the project is:

☐ **Exempt by Statute.** (PRC 21080[b]; 14 CCR 15260 et seq.)

☐ **Categorically Exempt. Class**. (PRC 21084; 14 CCR 15300 et seq.)

- ☐ No exceptions apply that would bar the use of a categorical exemption (PRC 21084 and 14 CCR 15300.2). See the SER Chapter 34 for exceptions.

☐ **Covered by the Commonsense Exemption**. This project does not fall within an exempt class, but it can be seen with certainty that there is no possibility that the activity may have a significant effect on the environment (14 CCR 15061[b][3].)

Caltrans NEPA Determination (Check one)

☐ **Not Applicable**

Caltrans has determined that this project has no significant impacts on the environment as defined by NEPA, and that there are no unusual circumstances as described in 23 CFR 771.117(b). See SER Chapter 30 for unusual circumstances. As such, the project is categorically excluded from the requirements to prepare an EA or EIS under NEPA and is included under the following:

☒ **23 USC 326:** Caltrans has been assigned, and hereby certifies that it has carried out the responsibility to make this determination pursuant to 23 USC 326 and the Memorandum of Understanding dated April 18, 2022, executed between FHWA and Caltrans. Caltrans has determined that the project is a Categorical Exclusion under:

- ☒ **23 CFR 771.117(c): activity (c)(3)**
- ☐ **23 CFR 771.117(d): activity (d)()**
- ☐ **Activity listed in Appendix A of the MOU between FHWA and Caltrans**

☐ **23 USC 327:** Based on an examination of this proposal and supporting information, Caltrans has determined that the project is a Categorical Exclusion under 23 USC 327. The environmental review, consultation, and any other actions required by applicable Federal environmental laws for this project are being, or have been, carried out by Caltrans pursuant to 23 USC 327 and the Memorandum of Understanding dated May 27, 2022, and executed by FHWA and Caltrans.

Date of Categorical Exclusion Checklist completion (if applicable): n/a
Date of Environmental Commitment Record or equivalent: See Continuation Sheet

Briefly list environmental commitments on continuation sheet if needed (i.e., not necessary if included on an attached ECR). Reference additional information, as appropriate (e.g., additional studies and design conditions).

Continuation sheet:

General:

- Environmental reevaluation will be required if the scope of the project changes to include additional areas or activities, or if previously unknown cultural or other sensitive resources are discovered. Contract Environmental Chief if project changes occur or sensitive resources are discovered.

Cultural:

- If cultural materials are discovered during construction, including human remains, do not disturb the resources and immediately stop all work within a 60-foot radius of the discovery and within any nearby area suspected to overlie the discovery. Immediately notify all appropriate parties including the Caltrans District 10 Local Assistance archaeologist, the Local Assistance Engineer (DLAE), and the County Coroner if human remains are found. Do not move cultural materials or take them from the job site. Do not resume work within the discovery area until authorized. Additional protocols for human remains are given in the State Health and Safety Code Section §7050.5 and §5097.98.

Hazardous Waste:

- Adhere to all recommendations outlined in the Initial Site Assessment Memorandum dated March 2025.

No Permits Required.

YOSEMITE AVENUE BIKE AND PEDSTRIAN IMPROVEMENT PROJECT
MANTECA, CALIFORNIA

Ms. Samuelson:

In accordance with the request of GPA Consulting on behalf of the City of Manteca (City), we have prepared this Initial Site Assessment (ISA) Technical Memorandum for the Yosemite Avenue Bike and Pedestrian Improvement Project in Manteca, California. The ISA Project Study Area consists of Yosemite Avenue between Walnut Avenue and Main Street. The proposed project includes construction of bike and pedestrian improvements including bike lanes, flashing beacons and signage, and enhanced pedestrian ramps and crossings.

The accompanying Technical Memorandum presents the details of the ISA. The report summarizes our findings relative to potential recognized environmental conditions and environmental concerns identified within the Project Study Area that may impact design and construction of the proposed roadway improvements within existing City right-of-way.

Please contact us should you have any questions concerning the contents of this ISA Technical Memorandum or if we may be of further service.

Sincerely,

GEOCON CONSULTANTS, INC.

INITIAL SITE ASSESSMENT TECHNICAL MEMORANDUM

1.0 INTRODUCTION

This Technical Memorandum presents the results of an Initial Site Assessment (ISA) of the Yosemite Avenue Bike and Pedestrian Improvement Project in Manteca, California. The ISA Project Study Area consists of Yosemite Avenue between Walnut Avenue and Main Street and adjacent properties/facilities.

This ISA was performed by Geocon Consultants, Inc. for GPA Consulting on behalf of the City of Manteca (City). The Project Study Area is depicted on the Project Location Map, Figure 1, Site Plans, Figures 2-1 through 2-3, and shown in the site photographs.

1.1 Purpose and Scope of Services

GPA and the City requested this ISA Technical Memorandum to determine the potential presence of environmental concerns within the Project Study Area that may impact design and construction of the planned roadway improvements within existing City right-of-way (ROW). This ISA Technical Memorandum was prepared in general accordance with the *Caltrans Initial Site Assessment Guidance Document* (Geomatrix, 2006).

The primary purpose of the ISA was to identify evidence or indications of 'recognized environmental conditions' (RECs) as defined by the ASTM International (ASTM) *Designation E 1527-21 Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process.* Section 1.1.1 of ASTM *Designation E 1527-21* defines an REC as: (1) the presence of hazardous substances or petroleum products in, on, or at the subject property due to a release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on, or at the subject property due to a release or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment. A de minimis condition is not a recognized environmental condition." De minimis conditions are those that generally do not present a threat to human health or the environment and that generally would not be the subject of the enforcement action if brought to the attention of appropriate governmental agencies.

We define a "potential environmental concern" as a past use of a site or adjoining or adjacent property that may have involved the use, storage, and/or release of hazardous substances or petroleum products that could have impacted the site, but for which there are no records or other information to confirm that use, storage, or release. An example would be the possible application of pesticides to an

agricultural field (i.e., irrigated row crop or orchard), but for which there are no records of such application or information from a knowledgeable person (i.e., site owner/occupant/operator) to confirm that application.

ASTM *Designation E1527-21* also defines 'Historical' and 'Controlled' RECs (HREC and CREC, respectively). An 'Historical REC' is defined as "a previous release of hazardous substances or petroleum products affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities and meeting unrestricted use criteria established by the applicable regulatory authority or authorities without subjecting the subject property to any controls (for example, activity and use limitations or other property use limitations)." A 'Controlled REC' is defined as "recognized environmental condition affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities with hazardous substances or petroleum products allowed to remain in place subject to implementation of required controls (for example, activity and use limitations or other property use limitations)." An HREC is not an REC if a property meets current standards for unrestricted residential use. A CREC remains an REC by definition when a property does not meet the unrestricted residential use requirement unconditionally.

The following principles are an integral part of ASTM *Designation E1527-21*:

- "**Uncertainty Not Eliminated** - No environmental site assessment can wholly eliminate uncertainty regarding the potential for recognized environmental conditions in connection with a subject property. Performance of this practice is intended to reduce, but not eliminate, uncertainty regarding the potential for recognized environmental conditions in connection with a subject property, and this practice recognizes reasonable limits of time and cost."

- "**Not Exhaustive** - All Appropriate Inquiries does not mean an exhaustive assessment of a property. There is a point at which the cost of information obtained, or the time required to gather it outweighs the usefulness of the information and, in fact, may be a material detriment to the orderly completion of transactions. One of the purposes of this practice is to identify a balance between the competing goals of limiting the costs and time demands inherent in performing an environmental site assessment and the reduction of uncertainty about unknown conditions resulting from additional information."

- "**Level of Inquiry is Variable** - Not every property will warrant the same level of assessment. Consistent with good commercial and customary standards and practices as defined at 42 U.S.C. § 9601(35)(B), the appropriate level of environmental site assessment will be guided by the type of property subject to assessment, the expertise and risk tolerance of the user, future intended uses of the subject property disclosed to the environmental professional, and the information developed in the course of the inquiry."

- **"Comparison with Subsequent Inquiry** - It should not be concluded or assumed that an inquiry was not all appropriate inquiries merely because the inquiry did not identify recognized environmental conditions in connection with a subject property. Environmental site assessments must be evaluated based on the reasonableness of judgments made at the time and under the circumstances in which they were made. Subsequent environmental site assessments should not be considered valid standards to judge the appropriateness of any prior assessment based on hindsight, new information, use of developing technology or analytical techniques, or other factors."

- **"Point in Time** - The environmental site assessment is based upon conditions at the time of completion of the individual environmental site assessment elements."

The main components of this report, as specified by the Caltrans ISA Guidance and ASTM Standard include the following:

- **Physical Setting:** Physical setting references were reviewed and observations made to obtain information concerning the topographic, geologic, and hydrogeologic characteristics of the Project Study Area. Such information may be indicative of the direction and/or extent that a contaminant could migrate in the event of a spill or release.

- **Site Reconnaissance:** The objective of the site reconnaissance was to observe conditions and activities for indications of evidence of recognized environmental conditions within the Project Study Area. The site reconnaissance was performed by making observations from public thoroughfares.

- **Site History:** The purpose of consulting historical references was to develop a history of the previous uses of the Project Study Area in order to identify if past uses have led to recognized environmental conditions in connection with the improvement project. Historical sources reviewed included Sanborn maps, topographic maps, aerial photographs and city directories provided by Environmental Data Resources (EDR).

- **Records Review:** The objective of the records review was to obtain and review records that will help identify recognized environmental conditions at or potentially affecting the improvement project. We reviewed publicly available Federal, State, and local regulatory agency records for facilities located within the Project Study Area.

1.2 Report Limitations

This ISA Technical Memorandum has been prepared exclusively for GPA Consulting on behalf of the City. The information obtained is only relevant for the dates of the records reviewed or as of the date of the site reconnaissance. Therefore, the information contained herein is only valid as of the date of the report and will require an update to reflect recent records and site observations.

This report is not a comprehensive site characterization and should not be construed as such. The findings and conclusions presented in this report are predicated on the site reconnaissance, a review of the historical usage of land in the Project Study Area, and a review of the specified regulatory records as presented in this report. We did not assess the Project Study Area for wetlands, or perform testing (sample collection and testing) for asbestos-containing building materials, lead-containing paint, lead in drinking water, mercury related to mining activities, methane, mold, or potential naturally occurring hazards such as radon and arsenic as part of this ISA.

Therefore, the report should only be deemed conclusive with respect to the information obtained. No guarantee or warranty of the results of the ISA is implied within the intent of this report or any subsequent reports, correspondence or consultation, either express or implied. We strived to conduct the services summarized herein in accordance with the local standard of care in the geographic region at the time the services were rendered.

2.0 PROJECT DESCRIPTION

This section provides a brief description of the Yosemite Avenue Bike and Pedestrian Improvement Project. Observations of onsite conditions are described in Section 3.0.

2.1 Existing Conditions and Improvements

Within the Project Study Area West Yosemite Avenue is a two-lane roadway with turn lanes, and concrete curb and sidewalks. Signal-controlled intersections are located at Walnut Avenue, Main Street, and the Union Pacific Railroad (UPRR) crossing. Other existing roadway improvements include street lights, and traffic calming features with the historic Downtown Manteca District within the eastern portion of the Project Study Area.

Development within the Project Study Area generally includes residential areas within the western portion of the Project Study Area and commercial businesses within the eastern portion.

2.2 Proposed Roadway Improvements

The information presented in this section was obtained from GPA Consulting. Copies of preliminary project plans are in Appendix A.

Project improvements would include installation of Class II bike lanes along the segment of West Yosemite Avenue from Walnut Avenue to Willow Ave, as well as the installation of rectangular rapid flashing beacons at Veach Avenue. The segment from Veech Avenue to Willow Avenue will have some Americans with Disabilities Act (ADA) ramp upgrades. Proposed enhanced pedestrian crossings are located at Locust Avenue, South and North Veach Avenue, Sequoia Avenue, and Jesse Avenue. Additionally, from Sycamore Avenue to Main Street the project will create a Class III bike route. Pavement markings and some signage would also be added along the entire segment.

Construction will occur entirely within existing paved surfaces and within the existing City ROW. No work is planned within the UPRR ROW. No temporary construction easements (TCEs) or utility relocations will be necessary. There is no tree or vegetation removal proposed as part of the project.

According to the Preliminary Environmental Study prepared for the project dated April 2024, maximum construction excavations will be 12 inches deep.

3.0 SITE RECONNAISSANCE

Mr. John Juhrend with Geocon performed a reconnaissance of the Project Study Area on March 23, 2025, to attempt to identify visual indicators of potential contamination sources. The reconnaissance was limited to viewing the Project Study Area from the public ROW. Information presented hereinafter is based on observations noted during the site reconnaissance. Identified facilities of concern (Map IDs) are depicted on the site plans. Photographs of the Project Study Area are attached.

The Project Study Area consists of West Yosemite Avenue between Walnut Avenue and Main Street, a two-lane asphalt concrete paved roadway. A signal-controlled intersection is located at Walnut Avenue at the western project boundary (Photo No. 1). The western portion of the Project Study Area generally consists of residential development (Photo No. 2). The UPRR crossing and a portion of the historic Downtown Manteca district are located in the eastern portion of the Project Study Area (Photo Nos. 3 and 4). A signal-controlled intersection is located at Main Street at the eastern project boundary (Photo No. 5).

One existing gasoline station facility (Sinclair) is located within the Project Study Area at 420 West Yosemite Avenue (Map ID 3, Photo No. 6). Three groundwater monitoring wells associated with the Sinclair facility were observed within the West Yosemite Avenue ROW in the northern sidewalk between Rose Lane and the UPRR crossing (Photo No. 7). A remediation system was further observed to the rear of the Sinclair facility. French Cleaners, a dry-cleaning facility, was observed adjacent to the Sinclair facility at 416 West Yosemite Avenue (Map ID 4, Photo No. 8).

Evidence of potential environmental concerns and/or potentially hazardous waste impacts observed within the Project Study Area include potential lead- and chromium-containing thermoplastic yellow lane striping, and soil and groundwater impacts associated with the Sinclair gasoline station and French Cleaners facilities (Map IDs 3 and 4).

4.0 PROJECT STUDY AREA HISTORY

This section summarizes information regarding the historical development and use of the Project Study Area. The historical information sources included Sanborn maps, historical topographic maps, aerial photographs, and city directories provided by EDR, an environmental and historical records search firm. Historical source documents were reviewed to obtain information regarding the history and the potential for impacts to the Project Study Area due to the former/existing generation, use, storage, and/or disposal of hazardous substances and/or petroleum products. Identified facilities of concern (Map IDs) are depicted on the site plans.

4.1 Review of Historical Sanborn Maps

Historical Sanborn maps provided by EDR for the years 1913, 1918, 1921 and 1941 covering the vast majority of the Project Study Area (immediately west of Almond Avenue to Main Street) were reviewed. A copy of the *Certified Sanborn® Map Report* dated March 25, 2025 is in Appendix B. The following summarizes features depicted on the maps within and adjacent to the Project Study Area:

- **Former Ford Garage (Map ID 1):** A former garage facility is depicted at the southwest corner of West Yosemite Avenue and Jessie Avenue on the 1918 and 1921 maps. A 550-gallon gasoline underground storage tank (UST) is depicted on the 1918 and 1921 maps within the West Yosemite Avenue ROW adjacent to this former facility.

- **Former Manteca Motor Garage/Gas Station (Map ID 2):** A former garage facility is depicted on the north side of West Yosemite Avenue across and slightly east from Jessie Avenue on the 1921 map. A gasoline UST is depicted on the 1921 and 1941 maps within the West Yosemite Avenue ROW adjacent to this former facility. A former gasoline station is depicted on the 1941 map further east of the former garage.

- **Former Gas Station (Map ID 5):** A former gas station is depicted at the southwest corner of West Yosemite Avenue and Willow Avenue on the 1941 map.

- **Former Gas Station (Map ID 6):** A former gas station is depicted along the south side of West Yosemite Avenue immediately west of Sycamore Avenue on the 1921 and 1941 maps.

- **Former Gas Station (Map ID 7):** A former gas station is depicted at the southeast corner of West Yosemite Avenue and Maple Avenue on the 1941 map.

- **Former Gas Station (Map ID 8):** A former gas station is depicted at the northwest corner of West Yosemite Avenue and Main Street on the 1921 and 1941 maps.

Potential subsurface impacts associated with former gasoline facilities and undocumented USTs within the West Yosemite Avenue ROW represents a potential environmental concern for the project.

4.2 Review of Historical Topographic Maps

Historical topographic maps provided by EDR for the years 1914, 1952, 1968, 1976, 1987, 1991, 1994, 2012, 2015, 2018 and 2021 were reviewed. A copy of the *EDR Historical Topo Map Report* dated March 24, 2025 is in Appendix C. The following summarizes information about the Project Study Area depicted on the maps (map scale in parenthesis):

- **1914 Map (1:31,680):** The 1914 map depicts the alignments of West Yosemite Avenue and cross streets within the Project Study Area. Southern Pacific Railroad (current UPRR) tracks are depicted crossing West Yosemite Avenue in the eastern portion of the Project Study Area. Structures are depicted along West Yosemite Avenue.

- **1952, 1968, 1976, 1987, 1991, and 1994 Maps (1:24,000):** These maps depicts urbanized Manteca including West Yosemite Avenue within the Project Study Area. The only landmark structures depicted are the Yosemite School and City Hall located on the north side of West Yosemite Avenue within the western and eastern portions of the Project Study Area.

- **2012, 2015, 2018 and 2021 Maps (1:24,000):** No specific development features other than existing roadways are depicted on these maps.

In summary, information on the historical USGS maps indicates that the current alignment of West Yosemite Avenue within the Project Study Area has existed since at least 1914 with the majority of adjacent development occurring since that time.

4.3 Review of Historical Aerial Photographs

We reviewed historical aerial photographs (1" = 625') provided by EDR for the years 1937, 1957, 1963, 1968, 1975, 1982, 1993, 2006, 2009, 2012, 2016 and 2020. A copy of *The EDR Aerial Photo Decade Package* dated March 24, 2025 is in Appendix D. The following summarizes information regarding the Project Study Area based on our review of the photographs:

- **1937, 1957, 1963, and 1968 Photographs:** Structures suggestive of gasoline station facilities were observed on the aerial photographs at the locations of Map IDs 2 (1937 only), 3, 5, 7 (gone by 1968), and 8.

- **1975 Photograph:** Structures suggestive of gasoline station facilities were observed on the aerial photographs at the locations of Map IDs 3 and 8.

- **1982, 1993, 2006, 2009, 2012, 2016 and 2020 Photographs:** By 1982 the only structure suggestive of a gasoline station facility observed on the aerial photographs is Map ID 2, the current Sinclair gasoline station at 420 West Yosemite Avenue.

The presence of former and existing gasoline station facilities within the Project Study Area represents a potential environmental concern to the project.

4.4 Review of City Directories

We reviewed historical city directories dated between 1960 and 2020 for addresses listed along West Yosemite Avenue adjacent to the Project Study Area. A copy of *The EDR-City Directory Image Report* dated March 25, 2025 is in Appendix E.

The following facility/business names associated with chemical use identified within the vicinity of Project Study Area in the city directories include the following:

- 506 West Yosemite Avenue (Map ID 1) – Manteca Motor 1968, Ford Service 1971 and 1974.

- 420 West Yosemite Avenue (Map ID 3) – Richfield 1968 and 1971, Arco 1974, Rainwater Car Wash/Minimart 1977, 1981, 1985, 1992, 1995, 2000 and 2010, Save on Gas 2014, 2017 and 2020.

- 416 West Yosemite Avenue (Map ID 4) – French Cleaners 1968, 1971, 1974, 1977, 1981, 1985, 1992, 1995, 2000, 2005, 2010, 2014, 2017 and 2020

- 406 West Yosemite Avenue (Map ID 5) – Union 1968 and 1971.

- 103 West Yosemite Avenue (Map ID 8) - Standard Stations, Inc. 1968, Chevron 1971, 1974, 1977, and 1981.

The presence of former and existing gasoline station and dry-cleaning facilities within the Project Study Area represents a potential environmental concern to the project.

5.0 REGULATORY AGENCY RECORDS

This section describes the review of regulatory agency database and records for listed facilities located along West Yosemite Avenue within the Project Study Area.

5.1 Database Review

EDR searched federal, state, and local environmental databases for the Project Study Area and surrounding areas. A copy of the report titled *The EDR Radius Map™ Report with GeoCheck®* dated March 24, 2025, is in Appendix F.

5.1.1 West Yosemite Avenue ROW

The West Yosemite Avenue ROW is not identified in any of the regulatory databases searched by EDR other than the UPRR railroad crossing listed on the CHMIRS database for a train collision with a stalled vehicle in 2006.

5.1.2 Adjacent Properties/Facilities

Numerous properties/facilities along West Yosemite Avenue adjacent to the Project Study Area are listed on non-release databases[1] for permitted air emissions, hazardous material use and storage, operation of USTs and/or aboveground storage tanks (AST), etc.

The following facilities along West Yosemite Avenue within the Project Study Area are listed on release databases and/or existing/former gasoline station facilities:

Rainwater Car Wash/Save on Fuel, 420 West Yosemite Avenue (Map ID 3) - this former carwash facility and existing gasoline station (Sinclair) is listed as Rainwater on the EDR Hist Auto database as a carwash facility between 1980 and 1997. The facility is listed for three fuel USTs as of 1989. Additional information for this facility is presented in the Regulatory Online Database Review, Section 5.2, of this report.

[1] "Release" refers to an unauthorized release of a petroleum product or hazardous substance to the environment - i.e. the ground surface, soil, soil vapor, groundwater, or surface water on a property. "Non-release database" refers to those that may report use, storage, or disposal of hazardous substances and/or petroleum products or other environmental conditions, but do not report releases of such. "Release database" refers to those which provide information regarding an unauthorized release.

French Cleaners, 416 West Yosemite Avenue (Map ID 4) - this existing dry-cleaning facility is listed as French Cleaners on the EDR Hist Cleaners database as a dry-cleaning plant between 1969 and 1992. The existing dry-cleaning facility is further listed on the Cleanup Program Site (CPS-SLIC) database as "Open - Assessment & Interim Remedial Action" as of 2024. The facility is regulated by the Central Valley Regional Water Quality Control Board (CVRWQCB) for potential releases of solvents to groundwater. Tetrachloroethane (PCE) and trichloroethene (TCE) were detected in groundwater samples collected from the adjacent gasoline station (former care wash) facility. PCE was further detected in soil gas during a limited investigation indicating that the French Cleaners facility is the likely source. Additional information for this facility is presented in the Regulatory Online Database Review, Section 5.2, of this report.

Costa Joseph L, 406 West Yosemite Avenue (Map ID 5) – this vacant facility is listed as a gasoline service station between 1969 and 1975.

5.2 Regulatory Online Database Review

We reviewed information available on the California State Water Resources Control Board's GeoTracker (http://geotracker.waterboards.ca.gov), and the California Department of Toxic Substances Control's (DTSC) EnviroStor (http://www.envirostor.dtsc.ca.gov/public/) online data management systems for information regarding documented environmental assessment and cleanup at properties/facilities adjacent to the Project Study Area. No information pertaining to the Project Study Area or properties/facilities adjacent to the Project Study Area is available on EnviroStor.

Rainwater Car Wash, 420 West Yosemite Avenue (Map ID 3) - this former carwash facility and existing gasoline station (Sinclair) is identified as a Leaking Underground Storage Tank (LUST) facility with status of "Open – Site Assessment." Three fuel USTs were removed from this facility in 1998. Elevated petroleum hydrocarbons were detected in soil samples collected from the UST excavation. The results of a 1999 preliminary site investigation identified elevated petroleum hydrocarbons in soil and groundwater beneath the facility. Between 1999 and 2018 additional investigations were completed including installation of onsite and offsite monitoring wells (including three groundwater monitoring wells within the Yosemite Avenue ROW – northern sidewalk) and operation of a remediation system. Vadose soil impacts are mapped within the facility footprint. The petroleum hydrocarbon groundwater plume (primarily MTBE and PCE) extends from the facility beneath West Yosemite Avenue and beyond to the north-northwest. The most recent monitoring event completed in June 2024 indicates that groundwater is generally at depths between 15 to 20 feet with flow to the east-northeast.

French Cleaners, 416 West Yosemite Avenue (Map ID 4) - this existing dry-cleaning facility was identified in 2003 as the likely source of elevated PCE concentrations in groundwater monitoring wells at the adjacent Rainwater Car Wash facility. A preliminary assessment was performed in 2004 including the collection of five soil gas samples. PCE was only detected at low concentrations in three of the five samples. A 2019 workplan detailed proposed sampling for soil, soil gas and groundwater. In writing dated January 30, 2025, the CVRWQCB issued a notice of violation (NOV) to the facility for failure to submit a workplan for additional sampling. The NOV further stated that PCE was detected in a City of Manteca municipal Well 22 in February 2024 that is attributed to releases at this facility.

6.0 CONCLUSIONS AND RECOMMENDATIONS

Geocon Consultants, Inc. performed an ISA of the Yosemite Avenue Bike and Pedestrian Improvement Project for GPA Consulting on behalf of the City of Manteca. The ISA Project Study Area consists of West Yosemite Avenue between Walnut Avenue and Main Street and adjacent properties/facilities. The planned roadway improvements will be constructed within existing City ROW.

The presence of six former gasoline stations, one existing gasoline station, and an existing dry-cleaning facility (Map IDs 1 through 8) within the eastern portion of the Project Study Area represents an environmental concern for the project. Gasoline USTs are mapped within the West Yosemite ROW in front of two historical refueling facilities in the vicinity of Jessie Avenue (Map IDs 1 and 2). Documented soil and groundwater impacts exist beneath the West Yosemite Avenue ROW associated with the Sinclair gasoline station and French Cleaners facilities (Map IDs 3 and 4).

Areas where apparent soil contamination (i.e. odor, staining, debris, etc.) are encountered during construction excavation activities (if any) should be isolated, and excavated soil stockpiled separately, and disposed of where appropriate to an accepting landfill facility. Notification to the San Joaquin County Environmental Health Department (SJCEHD) for regulatory oversight will be required if undocumented USTs and/or significant areas of contamination are encountered.

Three groundwater monitoring wells are located within the northern sidewalk of West Yosemite Avenue between Rose Lane and the UPRR crossing associated with the Sinclair gasoline station facility (Map ID 3). These wells should be protected in-place during construction activities.

The potential exists for aerially deposited lead (ADL) to be present within unpaved areas along West Yosemite Avenue within the Project Study Area. However, the planned roadway improvements are in paved areas and therefore investigation for ADL is not warranted. Any excess soil generated from the project should be sampled and analyzed to determine appropriate offsite reuse and/or disposal.

Asbestos-containing pipe may be encountered during construction of the planned roadway improvements that where disturbed would require proper handling and disposal in accordance with regulatory requirements. Additionally, yellow thermoplastic and paint striping that is removed during planned highway/roadway improvements may require special handling and disposal requirements.

Any undocumented subsurface structures including USTs, septic systems, and domestic/agricultural water wells encountered during construction excavation activities should be properly removed or abandoned in accordance with any applicable SJCEHD permitting requirements.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Geocon Consultants, Inc. were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Geocon Consultants, Inc. were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

EDR Topographic Map Library has been searched by EDR and maps covering the target property location as provided by Geocon Consultants, Inc. were identified for the years listed below. EDR's Historical Topo Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDRs Historical Topo Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the late 1800s.

Search Results:

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available business directory data at approximately five year intervals.

RECORD SOURCES

The EDR City Directory Report accesses a variety of business directory sources, including Haines, InfoUSA, Polk, Cole, Bresser, and Stewart. Listings marked as EDR Digital Archive access Cole and InfoUSA records. The various directory sources enhance and complement each other to provide a more thorough and accurate report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer.

RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. A check mark indicates where information was identified in the source and provided in this report.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527 - 21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E2247 - 16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E1528 - 22) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

EXECUTIVE SUMMARY

TARGET PROPERTY SEARCH RESULTS

The target property was not listed in any of the databases searched by EDR.

DATABASES WITH NO MAPPED SITES

No mapped sites were found in EDR's search of available ("reasonably ascertainable ") government records either on the target property or within the search radius around the target property for the following databases:

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL ---------- National Priority List
Proposed NPL ---------- Proposed National Priority List Sites
NPL LIENS ---------- Federal Superfund Liens

Lists of Federal Delisted NPL sites

Delisted NPL ---------- National Priority List Deletions

Lists of Federal sites subject to CERCLA removals and CERCLA orders

FEDERAL FACILITY ---------- Federal Facility Site Information listing
SEMS ---------- Superfund Enterprise Management System

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal RCRA generators

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting

the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 02/17/2025 has revealed that there are 2 RCRA-LQG sites within approximately 0.25 miles of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
FRENCH CLEANERS EPA ID:: CAD981638737	***416 W YOSEMITE***	***0 - 1/8 (0.000 mi.)***	***C15***	***55***
BAYER CROP SCIENCE EPA ID:: CAC002639475	251 OAK STREET C/O C	ESE 0 - 1/8 (0.055 mi.)	G48	212

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 02/17/2025 has revealed that there are 3 RCRA-SQG sites within approximately 0.25 miles of the target property.

RCRA-VSQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-VSQG list, as provided by EDR, and dated 02/17/2025 has revealed that there are 2 RCRA-VSQG sites within approximately 0.25 miles of the target property.

Federal ERNS list

ERNS: The Emergency Response Notification System records and stores information on reported releases of oil and hazardous substances. The source of this database is the U.S. EPA.

A review of the ERNS list, as provided by EDR, and dated 12/03/2024 has revealed that there is 1 ERNS site within approximately 0.001 miles of the target property.

Lists of state- and tribal (Superfund) equivalent sites

RESPONSE: Identifies confirmed release sites where DTSC is involved in remediation, either in a lead or oversight capacity. These confirmed release sites are generally high-priority and high potential risk.

A review of the RESPONSE list, as provided by EDR, has revealed that there are 2 RESPONSE sites within approximately 1 mile of the target property.

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 10/21/2024 has revealed that there are 13 ENVIROSTOR sites within approximately 1 mile of the target property.

Lists of state and tribal landfills and solid waste disposal facilities

SWF/LF: The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the Integrated Waste Management Board's Solid Waste Information System (SWIS) database.

A review of the SWF/LF list, as provided by EDR, has revealed that there is 1 SWF/LF site within

approximately 0.5 miles of the target property.

Lists of state and tribal registered storage tanks

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the State Water Resources Control Board's Hazardous Substance Storage Container Database.

A review of the UST list, as provided by EDR, has revealed that there are 22 UST sites within approximately 0.25 miles of the target property.

Local Lists of Hazardous waste / Contaminated Sites

SCH: This category contains proposed and existing school sites that are being evaluated by DTSC for possible hazardous materials contamination. In some cases, these properties may be listed in the CalSites category. depending on the level of threat to public health and safety or the. environment they pose.

A review of the SCH list, as provided by EDR, and dated 10/21/2024 has revealed that there is 1 SCH site within approximately 0.25 miles of the target property.

Local Lists of Registered Storage Tanks

SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there are 18 SWEEPS UST sites within approximately 0.25 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 02/17/2025 has revealed that there are 54 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

FINDS: The Facility Index System contains both facility information and "pointers" to other sources of information that contain more detail. These include: RCRIS; Permit Compliance System (PCS); Aerometric Information Retrieval System (AIRS); FATES (FIFRA [Federal Insecticide Fungicide Rodenticide Act] and TSCA Enforcement System, FTTS [FIFRA/TSCA Tracking System]; CERCLIS; DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes); Federal Underground Injection Control (FURS); Federal Reporting Data System (FRDS); Surface Impoundments (SIA); TSCA Chemicals in Commerce Information System (CICS); PADS; RCRA-J (medical waste transporters/disposers); TRIS; and TSCA. The source of this database is the U.S. EPA/NTIS.

A review of the FINDS list, as provided by EDR, and dated 11/11/2024 has revealed that there are 4 FINDS sites within approximately 0.001 miles of the target property.

ECHO: ECHO provides integrated compliance and enforcement information for about 800,000 regulated facilities nationwide.

A review of the ECHO list, as provided by EDR, and dated 12/21/2024 has revealed that there is 1 ECHO site within approximately 0.001 miles of the target property.

PFAS ECHO: Regulators and the public have expressed interest in knowing which regulated entities may be using PFAS. EPA has developed a dataset from various sources that show which industries may be handling PFAS. Approximately 120,000 facilities subject to federal environmental programs have operated or currently operate in industry sectors with processes that may involve handling and/or release of PFAS.

A review of the PFAS ECHO list, as provided by EDR, and dated 12/30/2024 has revealed that there is 1 PFAS ECHO site within approximately 0.25 miles of the target property.

UST FINDER RELEASE: US EPA's UST Finder data is a national composite of leaking underground storage tanks. This data contains information about, and locations of, leaking underground storage tanks. Data was collected from state sources and standardized into a national profile by EPA's Office of Underground Storage Tanks, Office of Research and Development, and the Association of State and Territorial Solid Waste Management Officials.

A review of the UST FINDER RELEASE list, as provided by EDR, and dated 06/08/2023 has revealed that

there are 17 UST FINDER RELEASE sites within approximately 0.5 miles of the target property.

UST FINDER: EPA developed UST Finder, a web map application containing a comprehensive, state-sourced national map of underground storage tank (UST) and leaking UST (LUST) data. It provides the attributes and locations of active and closed USTs, UST facilities, and LUST sites from states and from Tribal lands and US territories . UST Finder contains information about proximity of UST facilities and LUST sites to: surface and groundwater public drinking water protection areas; estimated number of private domestic wells and number of people living nearby; and flooding and wildfires.

A review of the UST FINDER list, as provided by EDR, and dated 06/08/2023 has revealed that there are 4 UST FINDER sites within approximately 0.25 miles of the target property.

E MANIFEST: EPA established a national system for tracking hazardous waste shipments electronically. This system, known as ?e-Manifest,? will modernize the nation?s cradle-to-grave hazardous waste tracking process while saving valuable time, resources, and dollars for industry and states.

A review of the E MANIFEST list, as provided by EDR, and dated 02/17/2025 has revealed that there are 32 E MANIFEST sites within approximately 0.25 miles of the target property.

CUPA Listings: A listing of sites included in the county's Certified Unified Program Agency database. California's Secretary for Environmental Protection established the unified hazardous materials and hazardous waste regulatory program as required by chapter 6.11 of the California Health and Safety Code. The Unified Program consolidates the administration, permits, inspections, and enforcement activities.

A review of the CUPA Listings list, as provided by EDR, has revealed that there is 1 CUPA Listings site within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

DRYCLEANERS: A list of drycleaner related facilities that have EPA ID numbers. These are facilities with certain SIC codes: power laundries, family and commercial; garment pressing and cleaners' agents; linen supply; coin-operated laundries and cleaning; drycleaning plants except rugs; carpet and upholster cleaning; industrial launderers; laundry and garment services.

A review of the DRYCLEANERS list, as provided by EDR, has revealed that there are 3 DRYCLEANERS sites within approximately 0.25 miles of the target property.

HWTS: DTSC maintains the Hazardous Waste Tracking System that stores ID number information since the early 1980s and manifest data since 1993. The system collects both manifest copies from the generator and destination facility.

A review of the HWTS list, as provided by EDR, and dated 07/19/2024 has revealed that there are 3 HWTS sites within approximately 0.001 miles of the target property.

HAZNET: The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000-1,000,000 annually, representing approximately 350,000-500,000 shipments. Data from non-California manifests & continuation sheets are not included at the present time. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, & disposal method. The source is the Department of Toxic Substance Control is the agency. This database begins with calendar year 1993.

A review of the HAZNET list, as provided by EDR, and dated 12/31/2024 has revealed that there are 2 HAZNET sites within approximately 0.001 miles of the target property.

CIWQS: The California Integrated Water Quality System (CIWQS) is a computer system used by the State and Regional Water Quality Control Boards to track information about places of environmental interest, manage permits and other orders, track inspections, and manage violations and enforcement activities.

A review of the CIWQS list, as provided by EDR, and dated 11/20/2024 has revealed that there is 1 CIWQS site within approximately 0.001 miles of the target property.

CERS: The CalEPA Regulated Site Portal database combines data about environmentally regulated sites and facilities in California into a single database. It combines data from a variety of state and federal databases, and provides an overview of regulated activities across the spectrum of environmental programs for any given location in California. These activities include hazardous materials and waste, state and federal cleanups, impacted ground and surface waters, and toxic materials

A review of the CERS list, as provided by EDR, and dated 10/15/2024 has revealed that there are 2

CERS sites within approximately 0.001 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 4 EDR Hist Auto sites within approximately 0.125 miles of the target property.

Environmental Interest/Information System:
The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS),EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), andToxic Release Inventory (TRI).

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Military DOD Site:	No
Facility Project Subtype:	Not reported
RWQCB Region:	CENTRAL VALLEY RWQCB (REGION 5S)
Claim No:	S0163
Claim Status:	Pending
Site History:	During groundwater monitoring of the Rainwater Car Wash UST case, tetrachloroethene (PCE) and trichloroethene (TCE) were discovered in groundwater. The Rainwater case borders the French Cleaners property to the west. A limited investigation of the French Cleaners property detected PCE in soil gas indicating that the French Cleaners dry-cleaning business may be the source of the chlorinated solvents detected in groundwater and soil gas in the area. In March 2024, the Central Valley Water Board issued a Water Code 13267 to suspected dischargers related to French Cleaners requiring the investigation of indoor air and soil vapor to assess the potential risks to occupants of the building located on the French Cleaners property as well as to residential and commercial buildings surround the property.

Environmental Interest/Information System:
The California Environmental Reporting System (CERS) is a statewide web-based user and information exchange system to support over 140,000 regulated businesses and over 130 local agencies in electronically collecting and reporting significant hazardous materials, hazardous waste and compliance and enforcement data as mandated by California law. Under oversight by Cal/EPA, certified local governing agencies (Unified Program Agencies - UPAs) consolidate, coordinate and provide consistent regulatory activities for six state and federal environmental programs.
THE EMISSION INVENTORY SYSTEM (EIS) MAINTAINS AN INVENTORY OF LARGE STATIONARY SOURCES AND VOLUNTARILY-REPORTED SMALLER SOURCES OF AIR POINT POLLUTANT EMITTERS. IT CONTAINS INFORMATION ABOUT FACILITY SITES AND THEIR PHYSICAL LOCATION, EMISSIONS UNITS, EMISSIONS PROCESSES, RELEASE POINTS, CONTROL APPROACHES, AND REGULATIONS. FACILITY INVENTORY DATA ARE KEPT SEPARATE FROM THE EMISSIONS DATA AND HAVE STABLE IDENTIFIERS TO IMPROVE CONTINUITY FROM YEAR TO YEAR AND TO HELP IDENTIFY DUPLICATE OR MISSING FACILITIES
The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS),EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), andToxic Release Inventory (TRI).
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
California's Hazardous Waste Tracking System Data Mart (HWTS-DATAMART) provides information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

CERS HAZ WASTE:
Name: FRENCH CLEANERS
Address: 416 W YOSEMITE AVE
City,State,Zip: MANTECA, CA 95337-5503
Site ID: 117988
CERS ID: 10183469
CERS Description: Hazardous Waste Generator

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 03-31-2015
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: Business has only 8 gallons of Exxon Dry Cleaning fluid, and about 150 pounds of Hazardous waste solid. Business is exempt from the Hazardous Material Business Plan (HMBP) program and from submitting HMBP to CERS. Please be aware as of January 1, 2013, all businesses are required to submit all hazardous materials information online to the California Environmental Reporting System (CERS) at http://cers.calepa.ca.gov. Be sure to include your hazardous material activity in the Businesses Activities section in CERS in addition to any other relevant activities and required fields.
Eval Division: San Joaquin County Environmental Health
Eval Program: HMRRP
Eval Source: CERS,

Eval General Type: Compliance Evaluation Inspection
Eval Date: 06-18-2020
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: All violations were corrected on site. Currently no open hazardous waste violations. To minimize person to person contact EHD is choosing to write the name of person receiving the report instead of having them sign. Starting September 1, 2018, all in-office CERS help will be provided at EHD hourly rate ($152). To schedule an appointment, please call (209) 468-3420. Documents provided during inspection: Inspection Report Waste streams found: used oil. The following minor violations were corrected on site: Minor violation 1: OBSERVATION: Hazardous waste containers were observed on-site with incomplete labeling. The containers were: -One 10-gallon drum with used oil observed lacking accumulation start date. Operator corrected on site by adding accumulation start date. Note: Operator stated that used oil comes from dry cleaning machine, the oil is drained approximately 3-4 times a month. REGULATION GUIDANCE: All hazardous waste containers shall be marked

NRC Report #:	923142
Description of Incident:	CALLER IS REPORTING THAT FOR OVER 1 YEAR THE COMPANY HAS BEEN DUMPING UNKNOWN AMOUNTS OF USED OIL FROM THERE FACILITY. THE CALLER THEN STATED THAT OVER TIME THE DRUM APPEARS TO BE A LOCAL DUMP SITE AS THERE ARE SEVERAL MILK CARTONS FULL OF OIL IN THE DRUM AND SEEPING INTO THE GROUND. HE ALSO STATED THAT HE STOPPED BY THE SITE ON NOV. 09TH AND NOTICED MORE OIL SEEPING INTO THE GROUND.
Type of Incident:	STORAGE TANK

Violation Date:	04-05-2018
Citation:	HSC 6.7 25292.1(a) - California Health and Safety Code, Chapter 6.7, Section(s) 25292.1(a)
Violation Description:	Failure to operate the UST system to prevent unauthorized releases including leaks, spills, and/or overfills.
Violation Notes:	Returned to compliance on 04/09/2019. Fuel filters were observed outside of the under dispenser containment (UDC) on all UDC dispensers. The underground storage tank system shall be operated to prevent unauthorized releases. Immediately take all necessary action to prevent unauthorized releases. Immediately contact a properly licensed, trained, and certified contractor to make repairs to the UST system under permit and inspection of the EHD.
Violation Division:	San Joaquin County Environmental Health
Violation Program:	UST
Violation Source:	CERS,
Site ID:	65388
Site Name:	SAVE ON FUEL
Violation Date:	04-05-2018
Citation:	23 CCR 16 2715(c) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2715(c)
Violation Description:	Failure to comply with one or more of the following designated operator (DO) monthly inspection requirements: Be performed by an ICC certified DO. Inspect monthly alarm history report, check that alarms are documented and responded to appropriately, and attach a copy. Inspect for the presence of liquid/debris in spill containers. Inspect for the presence of liquid/debris in under dispenser containment (UDC) and ensure that the monitoring equipment is positioned correctly. Inspect for liquid or debris in containment sumps where an alarm occurred with no service visit. Check that all testing and maintenance has been completed and documented. Verify that all facility employees have been trained in accordance with 23 CCR 2715(f)(2).
Violation Notes:	Returned to compliance on 05/07/2018. The designated operator failed to check and note the correct test dates for the Secondary Containment Testing on the March 2018 designated operator monthly inspection report. The report was lacking a secondary containment testing date when it was last performed. During the monthly inspection, the designated operator shall check that all required testing and maintenance for the UST system have been completed and document the

SAVE ON FUEL (Continued) **S107620058**

dates they were done. Ensure that designated operators performing monthly inspections at this facility are including all of the required information on the reports.

Violation Date:	04-18-2016
Citation:	23 CCR 16 2641(a) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2641(a)
Violation Description:	Failure of sensor to be located in the proper position/location.
Violation Notes:	Returned to compliance on 05/05/2016. The 91-octane sump sensor was located on the opposite side from the fuel piping and the test boot (inside the 91 STP sump), and not located to detect a leak at the earliest opportunity. The sump sensor cord was too short to relocate this sensor to the correct sump side. Monitoring equipment shall be maintained to be able to detect a leak at the earliest possible opportunity. Correct immediately by having a properly licensed, trained, and certified contractor replace the failed component with a functional component (LG 113-x listed, if applicable) and obtain a permit within one business day from the EHD. If the failed component can t be replaced immediately, there is a possibility that the 91 UST system may be red tagged to prevent fuel inputs.

Violation Description:	Failure to implement the corrections specified in the inspection report within 30 days of receiving an inspection report from either the UPA or special inspector.
Violation Notes:	Returned to compliance on 04/20/2020. OBSERVATION: An inspection was last done on 4/9/2019 and an inspection report was issued identifying information to be submitted to bring this site into compliance. This information was required to be submitted by 5/9/2019. This information has not been received resulting in a non-compliant status for this facility. REGULATION GUIDANCE: An operator that receives an inspection report shall have 30 days to implement the corrections specified in the inspection report and comply with permit conditions. The corrective action shall include all of the recommendations made in the report. The operator shall submit a written response that includes a statement documenting corrective actions taken or proposing corrective actions which will be taken. CORRECTIVE ACTION: Ensure that a written response documenting corrective actions taken or proposed is submitted and all corrections implemented within 30 days of receiving an inspection report.

Violation Description: Failure to comply with one or more of the following overfill prevention equipment requirements: Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1, 2018. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. For USTs installed on and after October 1, 2018, perform an inspection at installation and every 36 months thereafter. Inspected within 30 days after a repair to the overfill prevention equipment. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Inspected by a certified UST service technician. Maintain records of overfill prevention equipment inspection for 36 months.
Violation Notes: Returned to compliance on 04/01/2020. Owners or operators of underground storage tanks that do not meet California Code of regulations, title 23 division 3, chapter 16 section 2635(c)(2) shall test overfill prevention equipment once by October 13th, 2018 and every 36 months thereafter; and within 30 days of the date of a repair. The site was conducting the test today, over five months late. Ensure to conduct overfill prevention equipment inspection within the time frame provided by the regulation and submit test results within 30 days of performing the inspection. Ensure a 48 hour notification is provided to EHD prior to conducting the inspection.

SAVE ON FUEL (Continued) **S107620058**

containers shall have a minimum capacity of five gallons and be capable of containing a spill or overfill until it is detected or cleaned up. CORRECTIVE ACTION: Immediately discontinue deposition of petroleum into this tank until the component is repaired or replaced by a properly licensed, trained, and certified contractor under permit and inspection of the EHD. If the spill container can t be replaced immediately, there is a possibility that the 87 UST system may be red tagged to prevent fuel inputs.

SAVE ON FUEL (Continued) **S107620058**

	Section(s) 25284.2
Violation Description:	"Failure to meet one or more of the following requirements: Install or maintain a liquid-tight spill container. Have a minimum capacity of five gallons. Have a functional drain valve or other method for the removal of liquid from the spill container. Be resistant to galvanic corrosion. Perform a tightness test at installation, every 12 months thereafter, or within 30 days after a repair to the spill container. Tested using applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Tested by a certified UST service technician. Maintain records of spill containment testing for 36 months. "
Violation Notes:	Returned to compliance on 04/01/2020. OBSERVATION: The 91 product spill container failed when tested. REGULATION GUIDANCE: All USTs shall be equipped with a spill container that collects any hazardous substances spilled during delivery operations, that has a minimum capacity of five gallons and a drain valve that allows drainage of the collected spill into the primary container or provide a means to keep the container empty. CORRECTIVE ACTION: The drain valve in the 91 spill container was replaced and retested during the inspection. This was corrected on site.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
California's Hazardous Waste Tracking System Data Mart (HWTS-DATAMART) provides information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Citation:	22 CCR 12 66262.11 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.11
Violation Description:	Failure to determine if wastes generated are hazardous waste by using generator knowledge or applying testing method.
Violation Notes:	Returned to compliance on 01/06/2020. OBSERVATIONS: Metal fines from brake grinding were observed covering the grinder and collecting in a five gallon bucket below the grinder. A hazardous waste determination has not been made for this waste stream. REGULATION GUIDANCE: Any person who generates a waste shall determine if the waste is a hazardous waste as specified in Title 22 California Code of Regulations (CCR). There are wastes that are listed as hazardous wastes. There are wastes that exhibit one or more of the hazardous waste characteristics: toxic, corrosive, reactive or ignitable. Metal particles 100 microns or smaller in size must be handled and disposed of as hazardous waste if the metal is determined to be a hazardous waste. Metal particles larger than 100 microns in size can be recycled as scrap metal. CORRECTIVE ACTION: Immediately make a hazardous waste determination for the brake dust and manage it according to Title 22 CCR. Use Safety Data Sheets (SDS), waste sampling and test results or oth

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 11-27-2019
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: The following minor violations were corrected on site: -A modified contingency plan was provided and filled out during the inspection. -One drained used oil filter was observed on the ground in the shop in the hazardous waste storage area. This was corrected on site. -One black metal 55 gallon drum of used paper filters was observed in the hazardous waste storage area without a hazardous waste label. This was corrected on site. An inspection checklist was provided to the facility operator on the day of inspection. The EHD has written the complete report on 12/6/2019 which replaces the initial checklist. Complete and submit a copy of the Return to Compliance Certification form to the EHD with a statement documenting the corrective actions that have been or will be taken for each violation, and any supporting paperwork, by January 6, 2019. Starting September 1, 2018, all in-office CERS help will be provided at EHD hourly rate ($152). To schedule an appointment, ple

Hazardous Waste Summary:

Waste Code:	D001
Waste Description:	Ignitable Waste

BAYER CROP SCIENCE (Continued) **1014386522**

Waste Code: D002
Waste Description: Corrosive Waste

Waste Code: D003
Waste Description: Reactive Waste

Waste Code: D007
Waste Description: Chromium

Waste Code: D009
Waste Description: Mercury

Waste Code: D011
Waste Description: Silver

Waste Code: D013
Waste Description: Lindane (1,2,3,4,5,6-Hexa-Chlorocyclohexane, Gamma Isomer)

Waste Code: F003
Waste Description: The Following Spent Nonhalogenated Solvents: Xylene, Acetone, Ethyl Acetate, Ethyl Benzene, Ethyl Ether, Methyl Isobutyl Ketone, N-Butyl Alcohol, Cyclohexanone, And Methanol; All Spent Solvent Mixtures/Blends Containing, Before Use, Only The Above Spent Nonhalogenated Solvents; And All Spent Solvent Mixtures/Blends Containing, Before Use, One Or More Of The Above Nonhalogenated Solvents, And A Total Of Ten Percent Or More (By Volume) Of One Or More Of Those Solvents Listed In F001, F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F005
Waste Description: The Following Spent Nonhalogenated Solvents: Toluene, Methyl Ethyl Ketone, Carbon Disulfide, Isobutanol, Pyridine, Benzene, 2-Ethoxyethanol, And 2-Nitropropane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Nonhalogenated Solvents Or Those Solvents Listed In F001, F002, Or F004; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: P030
Waste Description: Cyanides (Soluble Cyanide Salts), Not Otherwise Specified

Waste Code: P105
Waste Description: Sodium Azide

Waste Code: U069
Waste Description: 1,2-Benzenedicarboxylic Acid, Dibutyl Ester (Or) Dibutyl Phthalate

Waste Code: U080
Waste Description: Methane, Dichloro- (Or) Methylene Chloride

Waste Code: U244
Waste Description: Thioperoxydicarbonic Diamide [(H2n)C(S)]2s2, Tetramethyl- (Or) Thiram

Waste Code: U410
Waste Description: Ethanimidothioic Acid, N,N'-[Thiobis[(Methylimino)Carbonyloxy]]Bis-, Dimethyl Ester (Or) Thiodicarb

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
The Section Seven Tracking System (SSTS) tracks the registration of all pesticide-producing establishments and tracks annually the types and amounts of pesticides, active ingredients, and related devices that are produced, sold, or distributed.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Site ID:	386907
Site Name:	AutoZone #3335
Violation Date:	06-28-2022
Citation:	22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description:	Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes:	Returned to compliance on 07/12/2022. OBSERVATION: A hazardous waste container was observed on-site with incomplete labeling. The container was: 1. One 55-gallon drum partially full of oil filters labeled "drained used oil filters". The filters are not punctured to fully drain out the oil. The filters are hauled from the site as non-RCRA hazardous waste with description "non conforming used oil filters" and state waste code 223. REGULATION GUIDANCE: All hazardous waste containers shall be marked with the following information: the words Hazardous Waste , name and address of generator, hazardous properties, physical state, composition (contents), accumulation start date CORRECTIVE ACTION: Immediately label the containers as required for hazardous waste. Provide a corrective action statement and supporting documentation to the San Joaquin County Environmental Health Department (EHD) within 30 days.
Violation Division:	San Joaquin County Environmental Health
Violation Program:	HW
Violation Source:	CERS,

Site ID:	386907
Site Name:	AutoZone #3335
Violation Date:	06-28-2022
Citation:	HSC 6.95 25508(a)(3) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(3)
Violation Description:	Failure to complete and electronically submit a site map with all required content.
Violation Notes:	Returned to compliance on 07/12/2022. OBSERVATION: The site map is incomplete for the following mandatory elements: 1. Drains are labeled incorrectly. Two drains labeled as "sewer drain" are actually storm water drains. 2. Loading and unloading locations for hazardous materials / hazardous waste are not included on the maps. 3. Internal roads are not addressed on the maps. Use N/A if there are no internal roads. 4. Access and Exit Points are not labeled. 5. Location of spill control equipment is not listed on the map. REGULATION GUIDANCE: A site map shall contain a north orientation, loading areas, internal roads, adjacent streets, storm and sewer drains, access and exit points, emergency shutoffs, evacuation staging areas, hazardous material handling and storage areas, and emergency response equipment. If a site map element is not applicable for your facility then list it on the map and label as NA". CORRECTIVE ACTION: Immediately log into the California Environmental Reporting System (

Citation: HSC 6.95 25508.2 - California Health and Safety Code, Chapter 6.95, Section(s) 25508.2
Violation Description: Failure to annually review and electronically certify that the business plan is complete and accurate on or before the annual due date.
Violation Notes: Returned to compliance on 07/12/2022. OBSERVATION: The business plan information was not reviewed and resubmitted in the California Environmental Reporting System (CERS) annually by the due date, January 15 for the 2021 reporting year. The submittal for the 2021 reporting year was submitted late on 1-27-21. REGULATION GUIDANCE: The hazardous materials inventory shall be submitted by January 15 of each calendar year and may be submitted beginning November 1 of the previous year. CORRECTIVE ACTION: Provide a corrective action statement to the San Joaquin County Environmental Health Department.

Violation Date:	01-28-2019
Citation:	HSC 6.5 25250.22 - California Health and Safety Code, Chapter 6.5, Section(s) 25250.22
Violation Description:	Failure to properly manage used oil and/or fuel filters in accordance with the requirements.
Violation Notes:	Returned to compliance on 01/31/2019. One black metal 55 gallon drum of drain used oil filters was observed without an accumulation start date. Used oil filters shall be drained of free-flowing oil, stored in a closed, rainproof container, labeled as drained used oil filters, and marked with an accumulation start date. Immediately mark date and ensure that all used oil filters are managed in this way.
Violation Division:	San Joaquin County Environmental Health
Violation Program:	HW
Violation Source:	CERS,

Site ID:	368674
Site Name:	Manteca Auto and Diesel Repair
Violation Date:	01-07-2016
Citation:	40 CFR 1 265.173 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.173
Violation Description:	Failure to properly close hazardous waste containers when not in active use.
Violation Notes:	Returned to compliance on 04/19/2016. Several open unlabeled drain pans which had oily liquid in them were located in the hazardous waste storage area. All hazardous waste containers shall be closed at all times except when adding or removing waste. Immediately close these containers and ensure all hazardous waste containers are closed when not adding or removing waste.
Violation Division:	San Joaquin County Environmental Health

Violation Date: 07-08-2019
Citation: 40 CFR 1 265.33 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.33
Violation Description: Failure to test and maintain as necessary all facility communications or alarm systems, fire protection equipment, spill control equipment, and decontamination equipment to assure its proper operation in time of emergency.
Violation Notes: Returned to compliance on 09/10/2019. Observed in the hazardous waste storage area: - Secondary containment for two 55 gallon containers with used oil observed with approximately 1 inch of used oil. Note: The manager of the shop states that he thinks there is a leak on the blue 55 gallon container with used oil and that is causing the problem with the secondary containment. I stated that he should get a new container for the used oil, since the current one might be leaking. All facility spill control equipment, where required, shall be tested and maintained as necessary to assure its proper operation in time of emergency. Immediately begin this practice. Submit statement and disposal receipt for the used oil in the secondary containment to EHD.

CERS:
Name: KELLY-MOORE PAINT COMPANY 0307
Address: 210 S MAIN ST
City,State,Zip: MANTECA, CA 95336
Site ID: 436340
CERS ID: 10481704
CERS Description: Chemical Storage Facilities

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 04-16-2019
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: No violations were found at time of inspection. Starting September 1, 2018, all in-office CERS help will be provided at EHD hourly rate ($152). To schedule an appointment, please call (209) 468-3420.
Eval Division: San Joaquin County Environmental Health
Eval Program: HMRRP
Eval Source: CERS,

Eval General Type: Compliance Evaluation Inspection
Eval Date: 09-18-2019
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: No violations observed. According to store manager, facility recently changed the hazardous waste managment procedures. In the past, the facility did not generate hazardous waste, and therefore no records were available. Waste streams observed: 1 gallon paint, universal waste aerosols, empty coloring containers, universal waste batteries. Starting September 1, 2018, all in-office CERS help will be provided at EHD hourly rate ($152). To schedule an appointment, please call (209) 468-3420.

Site ID: 34793
Site Name: GUZMAN'S AUTO REPAIR
Violation Date: 12-04-2014
Citation: 40 CFR 1 265.33 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.33
Violation Description: Failure of the facility to test and maintain all communications or alarm systems, fire protection equipment, spill control equipment, and decontamination equipment.
Violation Notes: Returned to compliance on 02/06/2015. Oily liquid was noted inside the secondary containment utilized for storage of the two existing 55-gallon containers of used antifreeze and used oil located inside the hazardous waste storage area . All facility communications or alarm systems, fire protection equipment, spill control equipment, and decontamination equipment, where required, shall be tested and maintained as necessary to assure its proper operation in time of emergency. Spill containment shall be maintained clean and dry at all times so as to detect a leak at the earliest opportunity. Immediately remove and properly dispose of all hazardous waste from spill containment, and maintain all spill containment clean and dry at all times. Submit proof of correction to the EHD. This is a repeat violation, Class II.

Citation: 22 CCR 12 66262.40(c) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.40(c)
Violation Description: Failure to determine if the waste generated is a hazardous waste and to maintain analysis results for three years.
Violation Notes: Returned to compliance on 01/09/2020. Metal fines are being generated from a metal grinder, located inside (adjacent to the shop entrance). This metal grinder is being used to resurface brake rotors and metal fines generated by this equipment (according to Mr. Magana) are being recycled as scrap metal without first determining particle size or hazardous properties. Metal fines were observed inside the particle collector, as well as on top of the equipment, and on the floor in its immediate vicinity; some metal fines appeared to be contaminated by an

GUZMAN'S AUTO REPAIR (Continued) **S121764225**

oily liquid. Mr. Magana stated that it will be more cost effective for his business to discontinue the practice of utilizing the metal grinder. Any person who generates a waste shall determine if the waste is a hazardous waste. Immediately stop recycling metal fines, make a hazardous waste determination for the metal fines, and manage it according to Title 22 hazardous waste regulations. Particles 100 microns or smaller must be handled as hazardous waste if the metal is de

Violation Description:	Failure to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles) for a generator who generates less than 1000 kilogram per month if all of the following conditions are met: (1) The quantity of hazardous waste accumulated onsite never exceeds 6,000 kilograms. (2) The generator complies with the requirements of 40 Code of Federal Regulations section 262.34(d), (e) and (f). (3) The generator does not hold acutely hazardous waste or extremely hazardous waste in an amount greater than one kilogram for more than 90 days.
Violation Notes:	Returned to compliance on 02/27/2020. OBSERVATION: The following hazardous waste containers were found on-site with an accumulation start date of greater than 180 days or no accumulation start date: -One 55 gallon drum with waste antifreeze observed with no hazardous waste label. Operator states that waste antifreeze have been on site longer than 180 days. REGULATION GUIDANCE: (a) Except as provided in subsections (c) and (d) of this section and section 66262.35, a generator may accumulate hazardous waste on-site for 90 days or less without a permit or grant of interim status, provided that: (b) The beginning of the 90 day period specified in subsections (a) and (c) of this section is determined as follows: (1) if the generator does not generate more than 100 kilograms of hazardous waste or one kilogram of acutely hazardous waste (listed in section 66261.33(e)) or one kilogram of extremely hazardous waste during any calendar month, the 90 day period begins on the date the generator has accumulated 100 kilo

	Chapter 12, Section(s) 66262.34(d)
Violation Description:	Failure to dispose of hazardous waste within 180 days (or 270 if waste is transported over 200 miles) for the generator who generates less than 1000 kilogram per month, but more than 100 kilograms per month.
Violation Notes:	Returned to compliance on 02/06/2015. This is a historical violation originally cited on the May 11, 2009 inspection report, during this historical inspection four 55-gallon containers had no appropriate labels and no accumulation start dates, since it could not be determined how long the aforementioned containers were onside, appropriate disposal of these containers was required at that time. Facilities who generate less than 1000 kg of hazardous waste per month and do not exceed 6000 kg of waste stored on site at any time may store waste on site up to 180 days. Since this a historical violation provide disposal records illustrating that the four drums of used oil were disposed following the May 2009 inspection. Provide proof of correction to the EHD. This is a Class II violation.

Eval Type: Routine done by local agency
Eval Notes: Complete and submit a copy of the Return to Compliance Certification form to the EHD with a statement documenting the corrective actions that have been or will be taken for each violation, and any supporting paperwork, by 2/8/2020 . Starting September 1, 2018, all in-office CERS help will be provided at EHD hourly rate ($152). To schedule an appointment, please call (209) 468-3420. Documents provided during inspection: Return to compliance certification, CUPA classes flier Waste streams found: Used oil, used antifreeze, used metal oil filters, used paper oil filters, soiled rags, used absorbent, oily water. Note: This business no longer generates metal fines. Operator states they stopped generating metal fines 4 years ago, they sold the shop's only metal grinder. Total hazardous waste generated for 2019 were found on San Joaquin County Excel Sheet.
Eval Division: San Joaquin County Environmental Health
Eval Program: HW
Eval Source: CERS,

Eval General Type: Compliance Evaluation Inspection
Eval Date: 07-22-2021
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Conducted a Hazardous Materials Business Plan (HMBP) inspection. There were 3 violations found during the inspection. Complete and submit a copy of the Return to Compliance Certification form to the EHD with a statement documenting the corrective actions that have been or will be taken for each violation, and any supporting paperwork, by 8/21/2021. To minimize person to person contact EHD is choosing to write the name of person receiving the report instead of having them sign. Starting September 1, 2018, all in-office CERS help will be provided at EHD hourly rate ($152). To schedule an appointment, please call (209) 468-3420.

Violations Found: Yes

GUZMAN'S AUTO REPAIR (Continued) **S121764225**

Eval Type: Routine done by local agency
Eval Notes: Complete and submit a copy of the Return to Compliance Certification form to the EHD with a statement documenting the corrective actions that have been or will be taken for each violation, and any supporting paperwork, by 9/29/2018. Please be aware as of January 1, 2013, all businesses are required to submit all hazardous materials information online to the California Environmental Reporting System (CERS) at http://cers.calepa.ca.gov. Be sure to include your hazardous material activity in the Businesses Activities section in CERS in addition to any other relevant activities and required fields.
Eval Division: San Joaquin County Environmental Health
Eval Program: HMRRP
Eval Source: CERS,

Eval General Type: Compliance Evaluation Inspection
Eval Date: 12-04-2014
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: A routine inspection was conducted on December 4, 2014, and a checklist of findings was left onsite at the time of inspection. A complete report was mailed to the facility on December 8, 2014. Complete and submit a copy of the Return to Compliance Certification form to the EHD with a statement documenting the corrective actions that have been or will be taken for each above violation, and any supporting paperwork, 30 days after the receipt of this inspection report. Consent to perform the inspection, take photos and collect samples was given by Mr. Carlos Magana. This facility routinely generates used oil, used antifreeze and oil and gasoline filters. Due to the lack of disposal records it is unknown at this time how much hazardous waste was generated by this facility in the last calendar year. Please be aware as of January 1, 2013, all businesses are required to submit all hazardous materials information online to the California Environmental Reporting System [Truncated]

Citation:	22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description:	Failure to properly label hazardous waste accumulation containers with

PRO-TOUCH AUTO REPAIR (Continued) **S113139363**

	the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes:	Returned to compliance on 10/13/2015. Four containers of used/waste oil had only the label which described the composition (contents) and lacked individual hazardous waste labels. One complete label, which according to the Mr. Gamez pertained to all of the containers was posted on the wall behind these containers. All individual hazardous waste containers shall be marked with the following information: - the words Hazardous Waste - name and address of generator - hazardous properties - physical state - composition (contents) - accumulation start date Immediately label these containers and ensure that all hazardous waste containers are marked with all the required information. This was corrected on site. Two open pans containing metal fines were noted adjacent to the metal working equipment. Mr. Gamez indicated that he will be handling this waste as hazardous. All hazardous waste containers shall be marked with the following information: - the words Hazardous Waste - and [Truncated]

Violation Date: 10-13-2015
Citation: 40 CFR 1 265.35 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.35
Violation Description: Failure to maintain aisle space to allow the unobstructed movement of personnel, fire protection, spill control equipment, and decontamination equipment to any area of facility operation in an emergency, unless it can be demonstrated to the Department that aisle space is not needed for any of these purposes.
Violation Notes: Returned to compliance on 11/12/2015. The observed four 55-gallon containers of used/waste oil were positioned on top of the secondary containment pallet which had some free staining oily liquid inside it . These four 55-gallon containers (located inside the shop) were located back to back against the wall with no access to the back two containers. Mr. Gamez indicated that he was already planing on changing the set up since the existing hazardous waste storage area is taking up too much space. Adequate aisle space shall be maintained to allow the unobstructed movement of personnel, fire protection, spill control equipment, and decontamination equipment to all areas of facility operation in an emergency. Immediately maintain aisle space to allow the unobstructed movement of personnel, fire protection, spill control equipment, and decontamination equipment to any area of facility operation in an emergency.

Violation Description:	Failure to maintain uniform hazardous waste manifest, consolidated manifest, or bills of lading copies for three years.
Violation Notes:	Returned to compliance on 01/19/2016. Manifest numbers 010191451JJK, and 010197740JJK were not found on site. Hazardous waste generators shall retain copies of all manifests for three years or until a copy signed off by the destination facility is received. The signed off copy shall be retained and made readily available for review for three years. If the generator did not receive a copy of the manifest with the handwritten signature of the owner or operator of the facility to which the generator s waste was submitted within 60 days of the date the waste was accepted by the initial transporter, the generator shall submit a legible copy of the missing manifest, with some indication that the generator has not received confirmation of delivery. This information shall be submitted to: DTSC Report Repository Generator Information Services Section P.O. Box 806 Sacramento, CA 95812-0806 Immediately locate a copy of the missing manifests or prepare and submit the required information to DTSC. Submit [Truncated]

Citation: 23 CCR 16 2712(b)(2) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(b)(2)
Violation Description: Failure to maintain monitoring records for release detection and/or maintain records of appropriate follow-up actions.
Violation Notes: Returned to compliance on 08/24/2022. OBSERVATION: Maintenance and monitoring records for the last three years were not found on site. -A copy of the 10/22/2020 overfill prevention equipment test results was not found on site during the inspection. REGULATION GUIDANCE: These records shall be maintained on site for at least three years. Monitoring records include: (1) date and time of all monitoring or sampling; (2) monitoring equipment calibration and maintenance records; (3) results of any visual observations; (4) results of sample analysis performed a lab or in the field; (5) logs of all readings of gauges or other monitoring equipment, ground water elevations, or other test results; (6) results of inventory readings and reconciliations. CORRECTIVE ACTION: Immediately locate and maintain all missing maintenance and monitoring records for the last three years on site and submit copies to the EHD.

Citation:	HSC 6.7 25291(b) - California Health and Safety Code, Chapter 6.7, Section(s) 25291(b)
Violation Description:	Failure of the UST system to be designed and constructed with a monitoring system capable of detecting the entry of the hazardous substance into the secondary containment.
Violation Notes:	Returned to compliance on 08/27/2018. The test boot for the 87 product and 91 product were not pulled back at the STP sump, nor was there an open shrader valve in either test boot. Any potential release from the primary containment into the secondary containment in the 87 product and 91 product piping does not flow into a collection sump. All secondary containment systems shall be sloped so that all releases will flow to a collection sump located at the low point of the underground piping. Immediately contact a properly licensed, trained, and certified contractor to ensure that any releases in the 87 product and the 91 product piping flows into the 87 product and 91 product piping sump.

Violation Description:	Failure to submit a complete and accurate application for a permit to operate a UST, or for renewal of the permit.
Violation Notes:	Returned to compliance on 08/03/2017. UST Tank Information forms for the 87 and 91 octane tanks are not current in CERS. The tank forms indicate in the "Vent, Vapor Recovery and Riser/Fill Pipe Construction" section under "Fill Components Installed" that there is a containment sump. All fill spill containers are direct bury and not in a sump. Additionally under Tank Construction section under Overfill Protection it is indicated there is an Audio/Visual Alarm used. There is no audio/visual alarm that would satisfy the requirements for the overfill protection. Any change of information must be updated in CERS within 30 days of the changes. Immediately log into CERS, update the required information, and submit for review by the EHD.

Violation Description: Failure to submit a complete and accurate application for a permit to operate a UST, or for renewal of the permit.
Violation Notes: Returned to compliance on 08/03/2017. UST Tank Information forms for the 87 and 91 octane tanks are not current in CERS. The tank forms indicate in the "Vent, Vapor Recovery and Riser/Fill Pipe Construction" section under "Fill Components Installed" that there is a containment sump. All fill spill containers are direct bury and not in a sump. Additionally under Tank Construction section under Overfill Protection it is indicated there is an Audio/Visual Alarm used. There is no audio/visual alarm that would satisfy the requirements for the overfill protection. Any change of information must be updated in CERS within 30 days of the changes. Immediately log into CERS, update the required information, and submit for review by the EHD.

Citation: HSC 6.95 25503.5(a) - California Health and Safety Code, Chapter 6.95, Section(s) 25503.5(a)
Violation Description: Owner/Operator failed to establish and implement a Hazardous Materials Business Plan when storing hazardous materials at or above the thresholds quantities of 55 gallons/500 lbs/200 cubic feet.
Violation Notes: Returned to compliance on 10/28/2014. A Hazardous Materials Business Plan has not been established or implemented. A Hazardous Materials Business Plan shall be established and implemented for emergency response to a release or threatened release of a hazardous material when storing hazardous materials at or above the thresholds quantities of 55 gallons for materials that are liquids, 500 pounds for solids, or 200 cubic feet for compressed gas, at standard temperature and pressure. Immediately log into the California Environmental Reporting System (CERS) at http://cers.calepa.ca.gov/, enter the required information, and submit for review by the EHD.

Violation Date: 09-16-2019
Citation: 22 CCR 12 66262.34(e) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(e)
Violation Description: Failure to meet the following conditions of satellite accumulation regulations: Accumulate up to 55 gallons of hazardous waste or one quart of acute hazardous waste at or near the initial point of accumulation which was under the control of the operator. Total time hazardous waste can be accumulated onsite in any generator accumulation area is one year, i.e., the combined accmulation time at a satellite accumulation point and at a 90/180/270 accumulation area (depending on size of generator and distance transported), whichever comes first. The generator complies with section 66265.171, 66265.172, and 66265.173(a). The container must be clearly marked with the initial date that hazardous waste is first placed in the container and labelled with the words Hazardous Waste including specified information Container must be labelled with the date the satellite accumulation limit is reached and moved within three days after reaching the 55 gallon (or one quart) limit to a 90 day accumulation area 55 gallons (or one quart of acute hazardous waste) of waste per process may be accumulated

DC IMPORT SERVICE INC (Continued) **S113038148**

Violation Notes:	Returned to compliance on 11/05/2019. OBSERVATION: Satellite hazardous waste containers were observed stored on-site for too many days. The following containers were observed: One 55 gallon drum of used paper filter with the accumulation start date 11/17/16. The most recent disposal record for paper filters was on 6/24/16. A 5 gallon bucket of metal shavings was observed with the accumulation start date 3/1/16 and no disposal records were available. Donny Darter stated the metal fines were last disposed of at a metal recycler after the last hazardous waste inspection on 1/29/16 but he did not retain a receipt or recall where it was taken. REGULATION GUIDANCE: Satellite accumulated waste shall not be stored on site for more than 180 days after the container was filled, or a total of one year, whichever comes first. CORRECTIVE ACTION: Immediately dispose of the hazardous waste in compliance with Title 22 California Code of Regulations. Provide a corrective action statement and a copy of the hazardous waste dispo

Citation:	40 CFR 1 262.34(d)(5)(iii) - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 262.34(d)(5)(iii)
Violation Description:	Failure to ensure that all employees are thoroughly familiar with proper waste handling and emergency procedures, relevant to their responsibilities during normal facility operations and emergencies.
Violation Notes:	Returned to compliance on 10/16/2019. OBSERVATION: At the time of inspection, it could not be demonstrated (not necessarily documented) that employees who handle hazardous waste were properly trained. Donny Darter stated it has been a while since the mechanics received training and there is a new mechanic that still needs hazardous waste training. REGULATION GUIDANCE: The business owner must ensure that all employees are thoroughly familiar with proper waste handling and emergency procedures, relevant to their responsibilities during normal facility operations and emergencies. CORRECTIVE ACTION: Immediately train the employees. Provide proof of training within 30 days to the San Joaquin County Environmental Health Department (EHD) for employees whose responsibilities include hazardous waste.

Violation Description:	Failure to determine if wastes generated are hazardous waste by using generator knowledge or applying testing method.
Violation Notes:	Returned to compliance on 10/16/2019. OBSERVATIONS: Observed a mop bucket with black dirty water in the shop. According to Donny Darter, owner, the small spills of oil, coolant, and other automotive liquid wastes are cleaned up with shop rags that are then laundered by Cintas. The shop floor is mopped up using a mop bucket and water and the dirty mop water is dumped into the alley behind the shop. REGULATION GUIDANCE: Any person who generates a waste shall determine if the waste is a hazardous waste as specified in Title 22 California Code of Regulations (CCR). There are wastes that are listed as hazardous wastes. There are wastes that exhibit one or more of the hazardous waste characteristics: toxic, corrosive, reactive or ignitable. CORRECTIVE ACTION: Immediately stop disposal of mop water into the alley and make a hazardous waste determination on the mop water. Use Safety Data Sheets (SDS), waste sampling and test results or other knowledge to support your hazardous waste determination. Waste testing must b

Address:	265 MOFFAT BLVD
City,State,Zip:	MANTECA, CA 95336
Site ID:	358506
CERS ID:	10644427
CERS Description:	Hazardous Waste Generator

Violations:

Site ID:	358506
Site Name:	Anthony's Auto Repair
Violation Date:	09-29-2015
Citation:	40 CFR 1 262.34(d)(5)(iii) - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 262.34(d)(5)(iii)
Violation Description:	Failure to ensure employees are familiar with the handling and compliance of hazardous waste regulations and emergency response.
Violation Notes:	Returned to compliance on 11/02/2015. At the time of inspection, it could not be demonstrated (not necessarily documented) that employees who handle hazardous waste were properly trained. The generator must

ANTHONY'S AUTO REPAIR (Continued) **S121765982**

ensure that all employees who handle hazardous waste are thoroughly familiar with proper waste handling and emergency procedures. Immediately provide training to all employees who handle hazardous waste and submit a copy of the training records to the EHD.

Violation Division: San Joaquin County Environmental Health
Violation Program: HW
Violation Source: CERS,

Site ID: 358506
Site Name: Anthony's Auto Repair
Violation Date: 09-29-2015
Citation: HSC 6.5 25160.2 - California Health and Safety Code, Chapter 6.5, Section(s) 25160.2
Violation Description: Failure to meet any of the following consolidated manifest requirements: 1) Legible receipts for each quantity of hazardous waste that is received from a generator, 2) The generator's information (name, address, identification number, contact person, telephone number of the generator, the signature of the generator or the generator's representative), 3) Date of the shipment, 4) The manifest number, 5) The volume or quantity of each waste stream received, 6) The name, address, and identification number of the authorized facility to which the hazardous waste will be transported, 7) The transporter's information (name, address, and identification number, the driver's signature), 8) A statement, signed by the generator, certifying that the generator has established a program to reduce the volume or quantity and toxicity of the hazardous waste to the degree economically practicable. 9) The generator shall retain each receipt for at least three years.
Violation Notes: Returned to compliance on 11/02/2015. Copies of hazardous waste disposal records for were not found on site. Reportedly this facility began operation in October of 2014. This facility shares the building with another family auto repair business located at 275 Moffat Blvd (Jack's Transmission Repair); the two facilities are interconnected and have a walkway between the two. According to Anthony Anacleto, the facility owner, he walks all his wastes (used oil, used antifreeze, waste absorbent, etc) and places it into his dad's hazardous waste storage area from which it's hauled away by a licensed hazardous waste hauler. Hazardous waste generators shall retain copies of all manifests signed off by the disposal facility and all receipts used in a consolidated manifesting procedure on site for three years and have them readily available for review. Begin a record keeping log which will document the date, the type and the quantity of the waste transfered from this facility to the neighboring facility. Submit proof of [Truncated]

Violation Date: 08-04-2022
Citation: HSC 6.5 25160.2 - California Health and Safety Code, Chapter 6.5, Section(s) 25160.2
Violation Description: Failure of a generator of hazardous waste that meets the conditions to be transported on a consolidated manifest to comply with one or more of the required consolidated manifesting procedures and retain copies of receipts for three years.

ANTHONY'S AUTO REPAIR (Continued) **S121765982**

Violation Notes:	Returned to compliance on 08/04/2022. OBSERVATION: The business operator could not provide hazardous waste disposal records for the past three years during the inspection. According to Anthony Anacleto, business owner, he does not generate any waste or sometimes generates very little waste. The business shares the building with Jack Transmission repair owned by the Dad (275 Moffat Blvd) the two facilities are interconnected and the small amount of waste he generates he walks and places it into his Dad's hazardous waste storage area from which it is hauled away by a licensed hazardous waste hauler. REGULATION GUIDANCE: The generator shall retain each consolidated manifest receipt for at least three years. This period of retention is extended automatically during the course of any unresolved enforcement action regarding the regulated activity or as requested by the department or a certified unified program agency. CORRECTIVE ACTION: Begin a record keeping log or consolidated manifest receipt which will documen

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
California's Hazardous Waste Tracking System Data Mart (HWTS-DATAMART) provides information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Violation Date:	09-29-2015
Citation:	40 CFR 1 265.173 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.173
Violation Description:	Failure to properly close hazardous waste containers when not in active use.
Violation Notes:	Returned to compliance on 11/02/2015. 1) One open unlabeled tub full of metal fines was located beneath the metal grinding equipment located inside the shop. Mr. Williamson indicated that no metal fines were disposed of from this equipment and that this waste has been onsite for at least one year; he also indicated that he will handle metal fines as hazardous waste. Metal fines were containerized at the time of inspection. 2) Two 5 gallon containers of waste transmission fluid with holes in their lids were located in the building room beneath the drain table. All hazardous waste containers shall be closed at all times except when adding or removing waste. Immediately close these containers and ensure all hazardous waste containers are closed when not adding or removing waste.

Violation Date:	09-29-2015
Citation:	40 CFR 1 265.32 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.32
Violation Description:	Failure of the facility to maintain the following emergency equipment or equivalents: 1) An internal communications or alarm system capable of providing immediate emergency instruction (voice or signal) to facility personnel; 2) A device, such as a telephone (immediately available at the scene of Operations/ Maintenance) or a hand-held two-way radio, capable of summoning emergency assistance from local police departments, fire departments, or State or local emergency response teams; 3) Portable fire extinguishers, fire control equipment (including special extinguishing equipment, such as that using foam, inert gas, or dry chemicals), spill control equipment, and decontamination equipment; and 4) Water at adequate volume and pressure to supply water hose streams, or foam producing equipment, or automatic sprinklers, or water spray systems.
Violation Notes:	Returned to compliance on 11/02/2015. The modified contingency plan indicated that spill control equipment is located inside the office, however no spill control equipment was found onsite. All facilities shall be equipped with an internal communication or alarm system, a device capable of calling outside emergency help, spill control equipment, and decontamination equipment at all times. Immediately provide spill control equipment and maintain on site. Provide proof of

- Site ID: 158244
- Site Name: SUPER STOP GAS & LIQUOR*
- Violation Date: 04-29-2019
- Citation: 23 CCR 16 2716(e) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2716(e)
- Violation Description: For designated operator (DO) monthly inspections conducted before October 1, 2018, failure to comply with one or more of the following requirements: Be performed by an ICC certified DO. Inspect monthly alarm history report, check that alarms are documented and responded to appropriately, and attach a copy. Inspect for the presence of liquid/debris in spill containers. Inspect for the presence of liquid/debris in under dispenser containment (UDC) and ensure that the monitoring equipment is positioned correctly. Inspect for liquid or debris in containment sumps where an alarm occurred with no service visit. Check that all testing and maintenance has been completed and documented. Verify that all facility employees have been trained in accordance with 23 CCR 2715(c). For designated operator (DO) 30 day inspections conducted on and after October 1, 2018, failure to conduct the designated UST operator visual inspection at least once every 30 days.
- Violation Notes: Returned to compliance on 05/16/2019. The designated operator failed to document the following: On the 10/30/18, 11/28/18, 12/27/18, 1/24/19, 2/21/19, 3/21/19 and 4/18/19 designated operator (DO) inspection reports under -Section IX The DO failed to mark Yes, No or N/A to the question "Are all sensors in under-dispenser containment located to detect a leak at the earliest opportunity?" During the designated operator inspection, the designated operator shall review the alarm history for the previous month, check that each alarm was documented and responded to appropriately, and attach a copy of the alarm history with documentation taken in response to any alarms to the monthly report. Ensure that designated operators performing inspections at least once every 30 days at this facility and are including all of the required information on the reports.

Citation:	23 CCR 16 2636(f)(2) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2636(f)(2)
Violation Description:	Failure of the functional line leak detector (LLD) monitoring pressurized piping to meet one or more of the following requirements: Monitored at least hourly with the capability of detecting a release of 3.0 gallons per hour leak at 10 pounds per square inch and restrict or shut off the flow of product through the piping when a leak is detected.
Violation Notes:	Returned to compliance on 04/29/2019. The Diesel product line leak detector failed to detect a leak when tested. All line leak detectors shall be capable of detecting a 3-gallon per hour leak at 10 psi. The service technician opened the Red Jacket FXIVD and found a piece of rubber trapped in the leak detector. He removed the small piece of rubber, retested the leak detector with passing results while the inspector was on site. This was corrected on site.

Violation Description:	Failure of a generator of hazardous waste that meets the conditions to be transported on a consolidated manifest to comply with one or more of the required consolidated manifesting procedures and retain copies of receipts for three years.
Violation Notes:	Returned to compliance on 05/24/2022. OBSERVATION: The facility could not provide all of the consolidated manifest receipts for hazardous waste transported from the site in the past three years. According to Mr.Mandeep Dua, the site has not had any hazardous waste disposal in the past one year. REGULATION GUIDANCE: The generator shall retain each consolidated manifest receipt for at least three years. This period of retention is extended automatically during the course of any unresolved enforcement action regarding the regulated activity or as requested by the department or a certified unified program agency. CORRECTIVE ACTION: Locate a copy of the receipts listed above. Maintain the records on-site for three years from the date of shipping and provide a copy to the San Joaquin County Environmental Health Department (EHD). If the receipts cannot be found, provide a statement to the EHD that future receipts will be maintained on-site for three years.

Site Name: SUPER STOP GAS & LIQUOR*
Violation Date: 04-29-2015
Citation: 23 CCR 16 2636(f)(1) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2636(f)(1)
Violation Description: Failure of the double wall pressurized piping in the under dispenser containment to be continuously monitored by a method that either shuts down the flow of product to the dispenser or activates an audible/visual alarm when a leak is detected.
Violation Notes: Returned to compliance on 05/21/2015. The Bravo box float and chain in the 5/6 UDC sump failed to stop the flow of product at the dispenser when tested. All monitoring equipment shall be maintained to activate an audible and visual alarm or stop the flow of product at the dispenser when it detects a leak. The service technician adjusted the chain(s) and verified functionality. The Bravo box float and chain in the 3/4 UDC sump (installed on the 87-octane product piping) failed to stop the flow of product at the dispenser when tested. All monitoring equipment shall be maintained to activate an audible and visual alarm or stop the flow of product at the dispenser when it detects a leak. A sign stating that the 87-octane product at UDC 3/4 is out of order was posted at the time of inspection. Correct immediately by having a properly licensed, trained, and certified contractor replace the failed component with a functional component (LG 113-x listed, if applicable) and obtain a permit within one business day [Truncated]

Violation Date: 04-29-2019
Citation: 23 CCR 16 2712(b)(1)(G) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(b)(1)(G)
Violation Description: Failure to comply with one or more of the following overfill prevention equipment requirements: Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1, 2018. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. For USTs installed on and after October 1, 2018, perform an inspection at installation and every 36 months thereafter. Inspected within 30 days after a repair to the overfill prevention equipment. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Inspected by a certified UST service technician. Maintain records of overfill prevention equipment inspection for 36 months.
Violation Notes: Returned to compliance on 05/28/2019. Owners or operators of underground storage tanks that do not meet California Code of regulations, title 23 division 3, chapter 16 section 2635(c)(2) shall test overfill prevention equipment once by October 13th, 2018 and

SUPER STOP GAS & LIQUOR* (Continued) **S121747854**

every 36 months thereafter; and within 30 days of the date of a repair. The site conducted the test on 4/29/19, over six months late. Ensure to conduct overfill prevention equipment inspection within the time frame provided by the regulation and submit test results within 30 days of performing the inspection. Ensure a 48 hour notification is provided to EHD prior to conducting the inspection. Test result for the testing performed must be submitted within 30 day of testing.

Site ID:	158244
Site Name:	SUPER STOP GAS & LIQUOR*
Violation Date:	04-25-2017
Citation:	22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description:	Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes:	Returned to compliance on 05/30/2018. 2-55 gallon steel drums were located in the hazardous waste storage area. One of the drums contained fuel contaminated liquids and the other contained fuel contaminated solids including filters and nozzles. Both drums had blank hazardous waste labels. All hazardous waste containers shall be marked with the following information: - the words Hazardous Waste - name and address of generator - hazardous properties (ignitable, corrosive, reactive, toxic) - physical state (liquid, solid) - composition (contents) - accumulation start date Immediately label these containers and ensure that all containers are marked with all the required information.

Violation Description:	Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes:	Returned to compliance on 04/29/2019. A green, five gallon container was found on site holding kitty litter with a hazardous waste label. The hazardous waste label was missing the content and hazardous properties. All hazardous waste containers shall be marked with the following information: - the words Hazardous Waste - name and address of generator - hazardous properties - physical state - composition (contents) - accumulation start date The operator added the missing information to the labeled of the green five gallon container while the inspector was on site to correct the violation. Ensure that all hazardous waste containers are marked with all the required information. This was corrected on site.

Violation Date:	04-02-2018
Citation:	23 CCR 16 2665 - California Code of Regulations, Title 23, Chapter 16, Section(s) 2665
Violation Description:	Failure to comply with one or more of the following: Failure to install or maintain a liquid-tight spill bucket. Have a minimum capacity of five gallons. Have a functional drain valve or other method for the removal of liquid from the spill bucket/spill container. Be resistant to galvanic corrosion.
Violation Notes:	Returned to compliance on 08/01/2018. The Diesel UST is not equipped with a functional spill container. All USTs shall be equipped with a spill container that has a minimum capacity of five gallons and a drain valve that allows drainage of the collected spill into the primary container or provide a means to keep the container empty. Immediately contact a properly licensed, trained, and certified contractor to install an approved spill container under permit and inspection of the EHD. If a spill container can t be installed immediately, there is a possibility that the Diesel UST system may be red tagged to prevent fuel inputs.

Violation Notes:	Returned to compliance on 04/24/2023. OBSERVATION: The designated operator failed to check and note all required items on the visual inspection reports. The incorrect and missing information included the following from the inspection reports: - The 7/28/22, 10/21/22,11/18/22, 01/13/23, 2/10/23 and 3/11/23 DO reports did not include owner/operator name. REGULATION GUIDANCE: During the visual inspection, the designated operator shall check that all required testing and maintenance for the UST system have been completed and shall check all required items on the report. CORRECTIVE ACTION: Ensure that designated operators performing visual inspections at this facility are including all of the required information on the reports. This was corrected on site.

Citation:	22 CCR 12 66262.34(d) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(d)
Violation Description:	Failure to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles) for a generator who generates less than 1000 kilogram per month if all of the following conditions are met: (1) The quantity of hazardous waste accumulated onsite never exceeds 6,000 kilograms. (2) The generator complies with the requirements of 40 Code of Federal Regulations section 262.34(d), (e) and (f). (3) The generator does not hold acutely hazardous waste or extremely hazardous waste in an amount greater than one kilogram for more than 90 days.
Violation Notes:	Returned to compliance on 05/30/2018. 2-55 gallon steel drums were located in the hazardous waste storage area. One of the drums contained fuel contaminated liquids and the other contained fuel contaminated solids including filters and nozzles. The labels on the drums did not have accumulation start dates. Facilities who generate less than 1000 kg of hazardous waste per month and do not exceed 6000 kg of waste stored on site at any time may store waste on site up to

RWQCB Region:	CENTRAL VALLEY RWQCB (REGION 5S)
Claim Number:	14719, E0239
Claim Status:	Active, Pending
Site History:	In December 1998, three underground storage tanks and associated dispensers/product piping were removed from this site. Soil samples collected from beneath the tanks and piping were reported to contain petroleum hydrocarbons indicating an unauthorized release had occurred. Between April 1999 and May 2018, additional investigations of the release were conducted to investigate the extent of the release. From January 2002 until March 2010, interim remediation by groundwater extraction was conducted. Currently, the site's methyl tertiary butyl ether (MTBE) and total petroleum hydrocarbons as gasoline (TPHg) plumes extend beyond the sites boundary and have not been delineated to their water quality objective. Central Valley Water Board staff (Staff) has requested the Responsible Party complete additional investigation(s) to delineate the plumes. The Responsible Party has not complied with Staff directives resulting in the issuance of Health and Safety Code 25296.10 Order, Notice of Violation, and referral of this case to enforcement. This case is currently stalled due to the Responsible Party's non-compliance.

Citation:	22 CCR 12 66262.20 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.20
Violation Description:	Failure to prepare a Uniform Hazardous Waste Manifest and, if necessary, a Continuation Sheet, before the transport of a hazardous

MANTECA HIGH SCHOOL (Continued) **S121786183**

	waste off-site for transfer, treatment, storage, or disposal.
Violation Notes:	Returned to compliance on 02/13/2019. Lab pack hazardous waste was transported off site for disposal on 2/24/17, 5/26/17,11/21/17,2/23/18,5/25/18, and 11/27/18 without first preparing a uniform hazardous waste manifest. A generator shall prepare a Uniform Hazardous Waste Manifest on EPA Form 8700-22 prior to the transport of a hazardous waste for off-site transfer, treatment, storage or disposal. Ensure that a manifest is prepared each time hazardous waste is transported for off site transfer, treatment, storage or disposal.
Violation Division:	San Joaquin County Environmental Health
Violation Program:	HW
Violation Source:	CERS,
Site ID:	46326
Site Name:	MANTECA HIGH SCHOOL
Violation Date:	01-11-2019
Citation:	HSC 6.5 Multiple - California Health and Safety Code, Chapter 6.5, Section(s) Multiple
Violation Description:	Hazardous Waste Generator Program - Abandonment/Illegal Disposal/Unauthorized Treatment - General
Violation Notes:	Returned to compliance on 02/13/2019. Lab pack hazardous wastes were transported off site by Manteca High School to Manteca Unified School District at 2271 W Louise Ave. Manteca, CA 95336 on 11/27/18, 5/25/18, 2/23/18, 2/24/17, 5/26/17, and 11/21/17. Manteca Unified School District is not a permitted TSDF. Hazardous wastes shall be disposed of only by transportation to a permitted hazardous waste treatment, storage, and disposal facility (TSDF). Immediately cease disposal of hazardous waste to Manteca Unified School District and ensure that all future waste is hauled by a licensed hazardous waste transporter to a permitted TSDF.
Violation Division:	San Joaquin County Environmental Health
Violation Program:	HW
Violation Source:	CERS,
Site ID:	46326
Site Name:	MANTECA HIGH SCHOOL

Citation:	HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description:	Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.
Violation Notes:	Returned to compliance on 09/15/2017. 100 gallons of latex paint were found on site that have not been reported. Any material that meets or exceeds the reportable quantity shall be reported in the facility's business plan. Immediately log into the California Environmental Reporting System (CERS) at http://cers.calepa.ca.gov/, add the materials to the hazardous material inventory, and submit to the EHD for approval.
Violation Division:	San Joaquin County Environmental Health

Violation Date:	01-11-2019

MANTECA HIGH SCHOOL (Continued) **S121786183**

Citation:	22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description:	Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes:	Returned to compliance on 02/13/2019. One yellow 30 gallon metal container with used absorbent located in the welding room observed with no hazardous waste label. All hazardous waste containers shall be marked with the following information: - the words Hazardous Waste - name and address of generator - hazardous properties - physical state - composition (contents) - accumulation start date Immediately label these containers and ensure that all containers are marked with all the required information. Since it cannot be determined how long the one yellow 55 gallon metal container with used absorbent located in the welding room observed with no hazardous waste label. has been on site, immediately contact a licensed hazardous waste hauler to dispose of this waste under manifest and submit a copy of the manifest to the EHD.

Violation Date:	01-11-2019
Citation:	40 CFR 1 265.173 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.173
Violation Description:	Failure to meet the following container management requirements: (a) A container holding hazardous waste must always be closed during storage, except when it is necessary to add or remove waste. (b) A container holding hazardous waste must not be opened, handled, or stored in a manner which may rupture the container or cause it to leak.
Violation Notes:	Returned to compliance on 02/13/2019. One metal 30 gallon yellow container with used absorbent was observed with no cap located in the welding room near the entrance of the class. All hazardous waste containers shall be closed at all times except when adding or removing waste. Immediately close these containers and ensure all hazardous waste containers are closed when not adding or removing waste.

Site History: Five USTs were removed in 1983. In August 2001 a site investigation was performed involving the advancement of four borings (GP-1 through GP-4) and gasoline constituents were detected in soil collected from boring GP-1 . September 2003, seven soil borings (B-1 through B-7) were advanced. Monitoring wells MW-1 and MW-2 were installed in September 2003, and MW-3 through MW-5 were installed in May 2004. Soil borings CPT-1 through CPT-4 were advanced in November 2007.

Site History: November 1988 three 1,000-gallon underground storage tanks used by the Ag Dept to store weed oil were removed from the site. Soil samples for analysis were collected from beneath the tanks; petroleum hydrocarbon contamination was noted in the analytical results. October 1999 a site investigation began with the advancement of

PRIVATE RESIDENCE (Continued) **S110655174**

geoprobe soil borings and the collection of soil and grab groundwater samples for analysis. March 2001 three groundwater monitoring wells were installed; all are impacted with petroleum hydrocarbon contamination. 2002 additional geoprobe borings were advanced to define the lateral extent of the plume. Additional groundwater monitoring wells are needed, the site is not defined.

Site History: Central Valley Water Board staff reviewed the case file for the Tri-Ag site listed in the State Water Resources Control Board (SWRCB) GeoTracker database as Global ID Number SLT5S4823431, located at 2112 South Main Street, Manteca, California. The Site is the former location of a soil fumigant, pesticide, and fertilizer applicator facility. From the early 1950s to 1982, Schmiedt Soil Service, Inc.

PRIVATE RESIDENCE (Continued) **S110655174**

(Schmiedt) operated at the Site. In 1982, the business was sold and renamed Tri-Ag. Tri-Ag operated at the Site until 2001. Since 2001, the Site has been utilized as a private residence. In 2003, Kleinfelder, Inc. (Kleinfelder) collected and analyzed a sample from the on-Site domestic well. In that sample, 1,2,3-Trichloropropane (1,2,3-TCP) was detected at a concentration of 4 micrograms per liter (μg/L), 1,2-Dichloropropane (1,2-DCP) was detected at 49 μg/L, and nitrate (measured as nitrogen) was detected at 209 milligrams per liter (mg/L). 1,2-DCP is a chemical compound formerly used as a fumigant insecticide while 1,2,3-TCP is a chemical solvent commonly associated with the application of soil fumigants as an impurity. Nitrate in groundwater is generally associated with septic systems, confined animal feeding operations, or fertilizer use. In 2004, Kleinfelder, on behalf of Schmiedt, submitted a Limited Soil & Groundwater Investigation Report for the Site to Central Valley Water Board staff. As part of this investigation, Kleinfelder installed three monitoring wells and collected water samples from the three new wells and the existing Site domestic well. The analytical results of the water samples indicated groundwater at the Site may be impacted by arsenic, cobalt, nitrate, 1,2- DCP, and 1,2,3- TCP at concentrations which potentially pose a risk to human health or the environment. On 28 August 2017, Kyle Brothers, on behalf of the property owner, Kimberly Martin, collected a sample from the on-Site domestic well. Central Valley Water Board staff requested the sampling due to historical detections of agrochemicals in groundwater samples collected from the Site domestic and monitoring wells. 1,2,3-TCP was detected in the sample at a concentration of 0.15 μg/L, exceeding the California notification level of 0.005 μg/L. Nitrate as nitrogen (N) was detected in the domestic well sample at a concentration of 25.8 mg/L, exceeding the California Maximum Contaminant Level (MCL) of 10 mg/L. 1,2-DCP was detected at a concentration of 1.6 μg/L, less than the MCL of 5 μg/L. Following receipt of the 2017 sampling results, Central Valley Water Board staff sent a Proposition 65 Disclosure (Disclosure) to the San Joaquin County Public Health Services and San Joaquin County Board of Supervisors. This Disclosure was prompted by a detection of 1,2,3-TCP in the onsite domestic well at a concentration above the California notification level. Central Valley Water Board staff have made multiple attempts spanning 2023 through 2025 to contact the current listed owners of the former Tri-Ag property. Three different letters have been sent requesting information on current use of the on-Site domestic well, updated groundwater sampling since 2017, and the status of the three Kleinfelder monitoring wells installed at the Site in 2003. To date, no contact has ever been established with the current property owners.

Claim Number: 13879
Claim Status: Active
Site History: Three underground storage tanks were removed from the site in 1988. Soil samples collected from beneath the tank were analyzed and reported petroleum hydrocarbon contamination. February 1999 a site investigation began with the installation of geoprobe soil borings;soil and grab groundwater samples were collected for analysis; more contamination was reported. Between December 1999 and January 2004 additional soil borings and groundwater monitoring wells were installed to define the vertical and lateral extent of the contaminant plume. September 2005 a soil vapor extraction test was conducted but failed, no contaminant vapors were recovered. January 2008 a dual phase extraction test was conducted, but also failed. The test was conducted during rainy weather, which precluded it working properly. The soil contamination remaining at this site is just under the water table. Onsite wells continue to report fairly high concentrations of contaminant. The State Water Quality Control Board Cleanup Fund recommends site closure. The Regional Water Quality Control Board disagrees with the recommendation for closure.

Hazardous Waste Summary:

Waste Code:	D000
Waste Description:	Not Defined
Waste Code:	D001
Waste Description:	Ignitable Waste
Waste Code:	D002
Waste Description:	Corrosive Waste
Waste Code:	D008
Waste Description:	Lead
Waste Code:	F001
Waste Description:	The Following Spent Halogenated Solvents Used In Degreasing: Tetrachloroethylene, Trichlorethylene, Methylene Chloride, 1,1,1-Trichloroethane, Carbon Tetrachloride And Chlorinated Fluorocarbons; All Spent Solvent Mixtures/Blends Used In Degreasing Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Halogenated Solvents Or Those Solvents Listed In F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.
Waste Code:	F003
Waste Description:	The Following Spent Nonhalogenated Solvents: Xylene, Acetone, Ethyl Acetate, Ethyl Benzene, Ethyl Ether, Methyl Isobutyl Ketone, N-Butyl Alcohol, Cyclohexanone, And Methanol; All Spent Solvent Mixtures/Blends Containing, Before Use, Only The Above Spent Nonhalogenated Solvents; And All Spent Solvent Mixtures/Blends Containing, Before Use, One Or More Of The Above Nonhalogenated Solvents, And A Total Of Ten Percent Or More (By Volume) Of One Or More Of Those Solvents Listed In F001, F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.

Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Description: This Site is located within a residential district of Manteca. The

NUR-AL-HUDA ACADEMY (Continued) **S108936081**

southwestern corner of the property abuts the northwestern corner of the Brock Elliot Elementary School. In October of 2007, San Joaquin County Environmental Health Department conducted an inspection which revealed wastes accumulated and potentially being deposited into the soil at the Site. Reportedly, trespassers are scavenging for recyclable or salable materials, or squatting on the Site. A deceased owner of the property operated numerous commercial ventures at the Site and maintained a residence at the property. The county requested DTSC oversight of the removal and disposal of the improperly stored chemicals at the site. A review of the available DTSC file revealed that prior to 1988, a chemical formulation, repackaging and resale businesses operated at the Site. The businesses were known as Gordon Research Company and U.S. Gordon Subproperty. These businesses purchased bulk chemicals and stored them at the site. In 1984, in response to a complaint received by the State of California Department of Health Services (DHS), a predecessor to DTSC, conducted an inspection at the site. The inspection revealed activities for which the operator did not hold the required permits. By December 1985, DHS inspections found that most of the chemicals were removed from the Site. From 1984 through 1986 the San Joaquin District Attorney's Office in conjunction with DHS conducted enforcement actions which resulted in chemicals being removed from the property. In 1986; the San Joaquin County Superior Court issued a permanent injunction which prohibited Larry Gordon, dba Gordon Research Company, dba U.S. Gordon Subproperty from handling treating, storing, or disposing of hazardous substances/wastes. In 1988, the site was inspected by DHS staff, the Manteca Fire Department, and the county District Attorney's office. At the time of the inspection, a portion of the property was surrounded by a fence. Within the fenced area 10-20 drums were noted. These drums contained products used by the property owner in maintaining equipment used in the commercial/agricultural operations. The October 2007 inspection revealed, among other things, unlabeled containers and high-pressure cylinders. Open containers with handwritten notations were observed. All of the containers have been exposed to the elements some of them have deteriorated and are leaking. Containers are stored in the open and accessible to trespassers. There are between ten (10) and twenty (20) compressed gas cylinders which are not labeled nor stored in a manner consistent with proper industrial standards. There is at least one large battery at the site. On November 28, 2007 DTSC issued an Imminent & Substantial Determination and Order which specifies the assessment and remedies necessary to address the conditions at the site. In response to the determination and order, representatives of the property owner has installed and regularly maintains the fence that surrounds the site, submitted a draft public participation plan, and a draft chemical identification and disposal plan. Between 2008 and 2011, DTSC completed the removal of contamination from the site began by the responsible party and conducted a Preliminary Endangerment Assessment (PEA) where two rounds of soil and groundwater sampling was done. From the sampling results, it was found that several hotspots exist on the site that will require remediation. The type of remediation recommended in the PEA report is soil removal. In addition, DTSC has initiated cost recovery actions by placing a lien against the property. In May 2017, DTSC settled with a prospective purchaser, the Nur-Al Huda Academy, for past costs and cleanup of the property for redevelopment. See the Nur-Al Huda project for recent information.

Environmental Interest/Information System:
The Toxic Release Inventory System (TRIS) is a publicly available EPA database reported annually by certain covered industry groups, as well as federal facilities. It contains information about more than 650 toxic chemicals that are being used, manufactured, treated, transported, or released into the environment, and includes information about waste management and pollution prevention activities.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
California's Hazardous Waste Tracking System Data Mart (HWTS-DATAMART) provides information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as

INDY ELECTRONICS (Continued) **1000439971**

cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 12/19/2024

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 12/19/2024

Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991
Date Data Arrived at EDR: 02/02/1994

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Lists of Federal sites subject to CERCLA removals and CERCLA orders

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 11/20/2024

Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Lists of Federal RCRA generators

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Date of Government Version: 05/20/2024

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

EPA WATCH LIST: EPA Watch List

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines
An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

PFAS RCRA MANIFEST: PFAS Transfers Identified In the RCRA Database Listing

To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: PFAS, PFOA, PFOS, PERFL, AFFF, GENX, GEN-X (plus the VT waste codes). These keywords were searched for in the following text fields: Manifest handling instructions (MANIFEST_HANDLING_INSTR), Non-hazardous waste description (NON_HAZ_WASTE_DESCRIPTION), DOT printed information (DOT_PRINTED_INFORMATION), Waste line handling instructions (WASTE_LINE_HANDLING_INSTR), Waste residue comments (WASTE_RESIDUE_COMMENTS).

PFAS NPDES: Clean Water Act Discharge Monitoring Information

Any discharger of pollutants to waters of the United States from a point source must have a National Pollutant Discharge Elimination System (NPDES) permit. The process for obtaining limits involves the regulated entity (permittee) disclosing releases in a NPDES permit application and the permitting authority (typically the state but sometimes EPA) deciding whether to require monitoring or monitoring with limits. Caveats and Limitations: Less than half of states have required PFAS monitoring for at least one of their permittees and fewer states have established PFAS effluent limits for permittees. New rulemakings have been initiated that may increase the number of facilities monitoring for PFAS in the future.

PFAS PROJECT: NORTHEASTERN UNIVERSITY PFAS PROJECT

The PFAS Contamination Site Tracker records qualitative and quantitative data from each site in a chart, specifically examining discovery, contamination levels, government response, litigation, health impacts, media coverage, and community characteristics. All data presented in the chart were extracted from government websites, such as state health departments or the Environmental Protection Agency, and news articles.

PFAS ECHO: Facilities in Industries that May Be Handling PFAS Listing

Regulators and the public have expressed interest in knowing which regulated entities may be using PFAS. EPA has developed a dataset from various sources that show which industries may be handling PFAS. Approximately 120,000 facilities subject to federal environmental programs have operated or currently operate in industry sectors with processes that may involve handling and/or release of PFAS.

PFAS ECHO FIRE TRAIN: Facilities in Industries that May Be Handling PFAS Listing

A list of fire training sites was added to the Industry Sectors dataset using a keyword search on the permitted facilitys name to identify sites where fire-fighting foam may have been used in training exercises. Additionally, you may view an example spreadsheet of the subset of fire training facility data, as well as the keywords used in selecting or deselecting a facility for the subset. as well as the keywords used in selecting or deselecting a facility for the subset. These keywords were tested to maximize accuracy in selecting facilities that may use fire-fighting foam in training exercises, however, due to the lack of a required reporting field in the data systems for designating fire training sites, this methodology may not identify all fire training sites or may potentially misidentify them.

PFAS PT 139 AIRPORT: All Certified Part 139 Airports PFAS Information Listing

Since July 1, 2006, all certified part 139 airports are required to have fire-fighting foam onsite that meet military specifications (MIL-F-24385) (14 CFR 139.317). To date, these military specification fire-fighting foams are fluorinated and have been historically used for training and extinguishing. The 2018 FAA Reauthorization Act has a provision stating that no later than October 2021, FAA shall not require the use of fluorinated AFFF. This provision does not prohibit the use of fluorinated AFFF at Part 139 civilian airports; it only prohibits FAA from mandating its use. The Federal Aviation Administration?s document AC 150/5210-6D - Aircraft Fire Extinguishing Agents provides guidance on Aircraft Fire Extinguishing Agents, which includes Aqueous Film Forming Foam (AFFF).

AQUEOUS FOAM NRC: Aqueous Foam Related Incidents Listing

The National Response Center (NRC) serves as an emergency call center that fields initial reports for pollution and railroad incidents and forwards that information to appropriate federal/state agencies for response. The spreadsheets posted to the NRC website contain initial incident data that has not been validated or investigated by a federal/state response agency. Response center calls from 1990 to the most recent complete calendar year where there was indication of Aqueous Film Forming Foam (AFFF) usage are included in this dataset. NRC calls may reference AFFF usage in the ?Material Involved? or ?Incident Description? fields.

UST FINDER: UST Finder Database

EPA developed UST Finder, a web map application containing a comprehensive, state-sourced national map of underground storage tank (UST) and leaking UST (LUST) data. It provides the attributes and locations of active and closed USTs, UST facilities, and LUST sites from states and from Tribal lands and US territories . UST Finder contains information about proximity of UST facilities and LUST sites to: surface and groundwater public drinking water protection areas; estimated number of private domestic wells and number of people living nearby; and flooding and wildfires.

CHROME PLATING: Chrome Plating Facilities Listing

This listing represents chrome plating facilities the California State Water Resources Control Board staff identified as possibly being a source of Per- and polyfluoroalkyl substance (PFAS) contamination. Sites and locations were identified by staff with the Division of Water Quality in the California State Water Board. Data was collected from the CA Air Resources Board 2013 and 2018 - Cr VI emission survey, CA Emission Inventory, CA HAZ Waste discharge database and by reviewing storm water permits. Former chrome plating sites are also included that are open site investigation or remediation cases with the Regional Water Quality Control Boards and the Department of Toxic Substances Control.

Data Release Frequency: Varies

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing
Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing
In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations
EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.
Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes
Source: National Institutes of Health

GEOCHECK ®- PHYSICAL SETTING SOURCE ADDENDUM

TARGET PROPERTY ADDRESS

YOSEMITE AVENUE ISA
WALNUT AVENUE TO MAIN STREET
MANTECA, CA 95337

TARGET PROPERTY COORDINATES

Latitude (North):	37.7974 - 37° 47' 50.64''
Longitude (West):	121.222544 - 121° 13' 21.16''
Universal Tranverse Mercator:	Zone 10
UTM X (Meters):	656494.4
UTM Y (Meters):	4184619.2
Elevation:	36 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	50003381 MANTECA, CA
Version Date:	2021

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

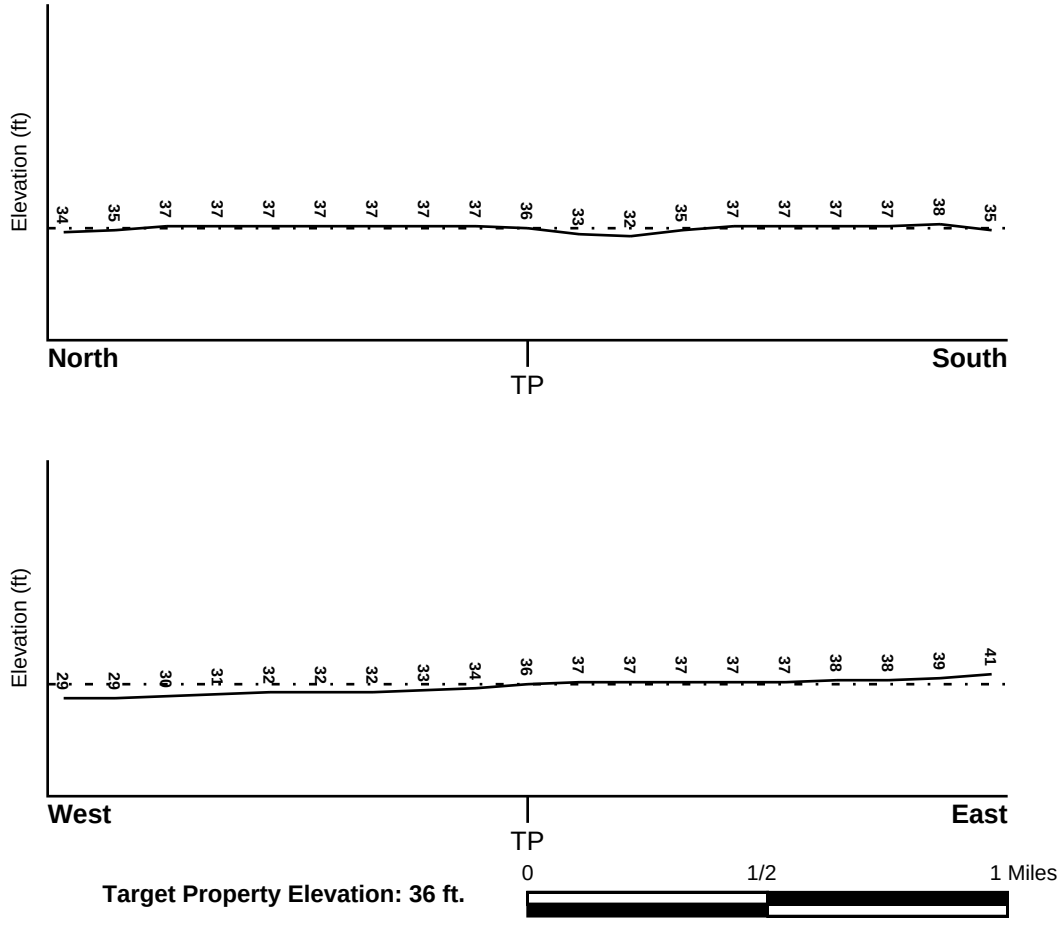

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
06077C0640F	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type
Not Reported	

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
MANTECA	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW
Not Reported

All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

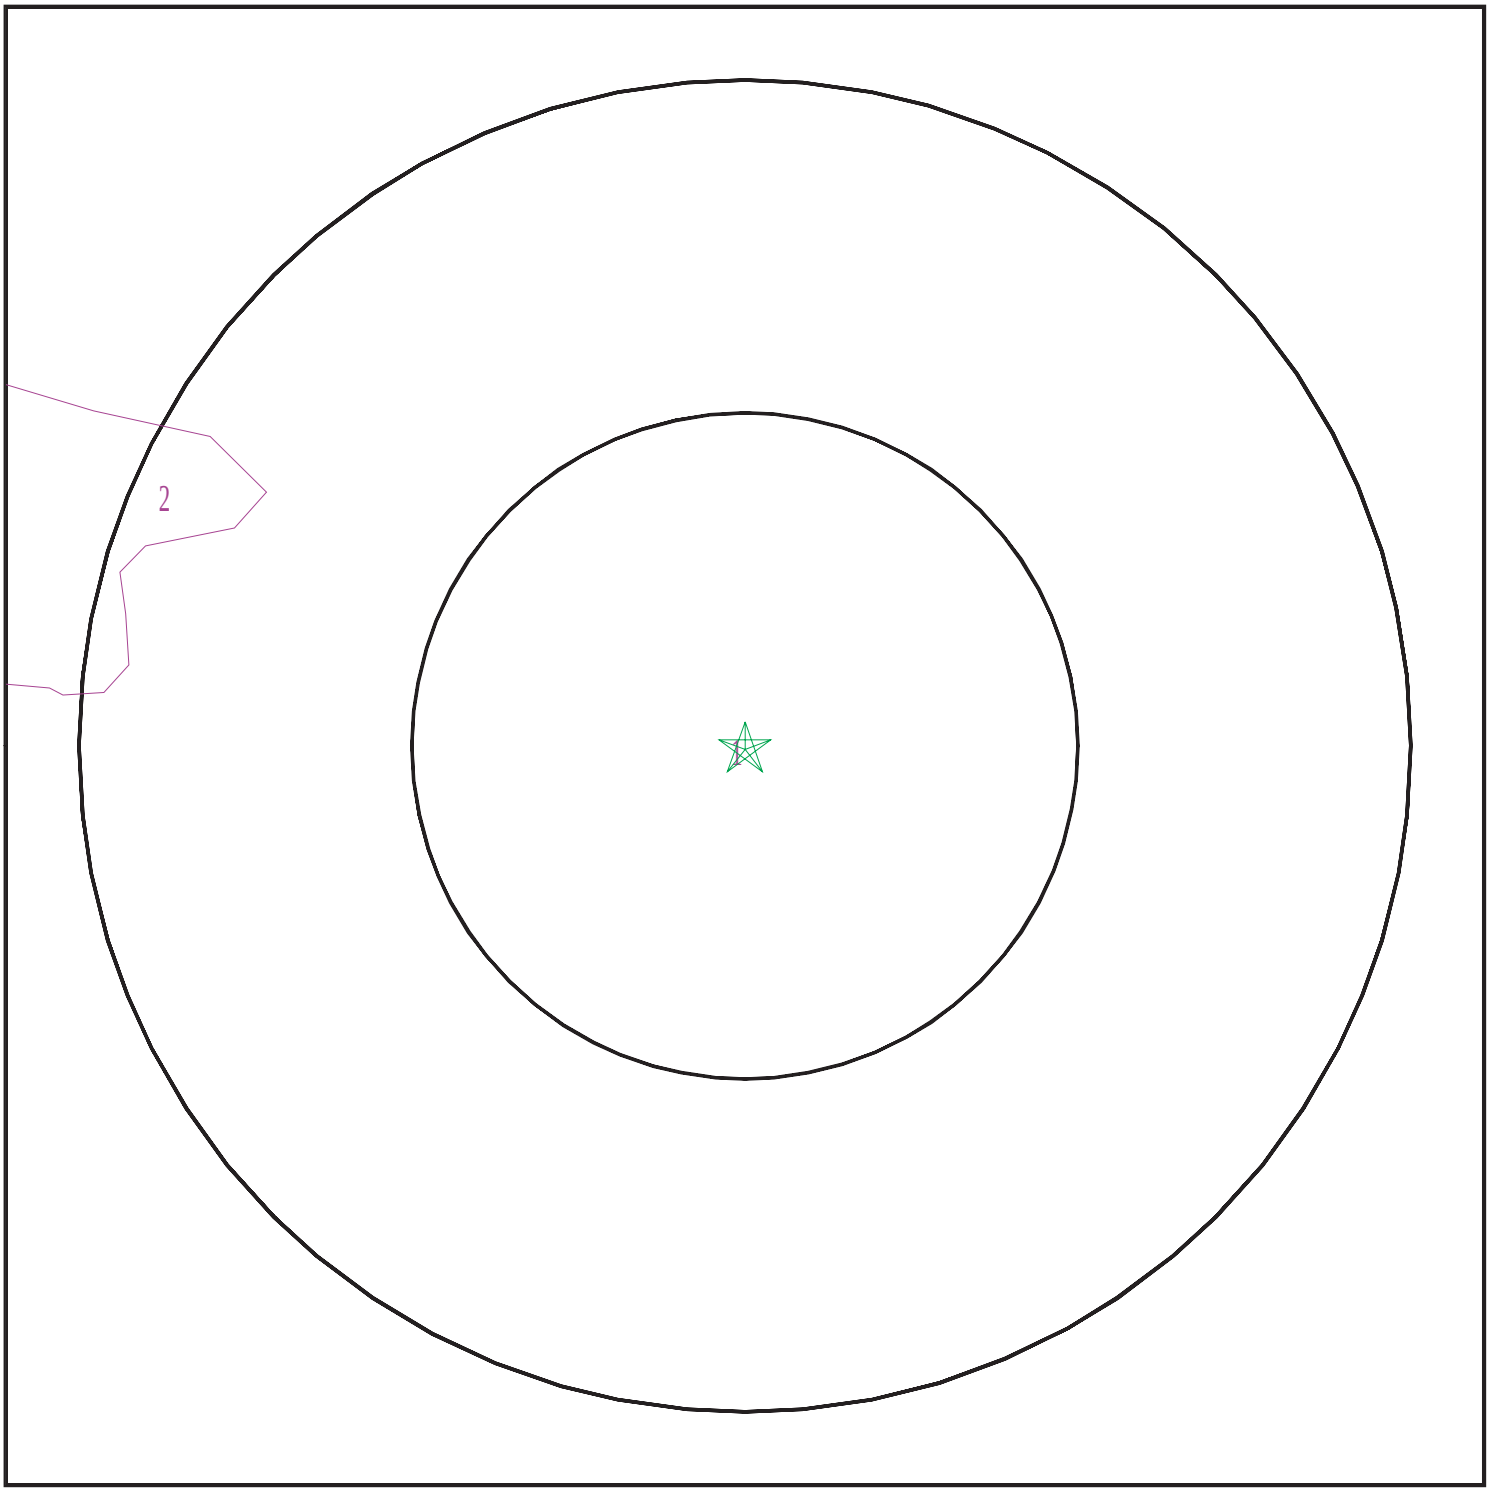

Era:	Cenozoic

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: DELHI

Soil Surface Texture: loamy sand

Hydrologic Group: Class A - High infiltration rates. Soils are deep, well drained to excessively drained sands and gravels.

Soil Drainage Class: Somewhat excessively drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	16 inches	loamy sand	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: 7.8 Min: 6.1
2	16 inches	25 inches	loamy sand	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: 7.8 Min: 6.1
3	25 inches	59 inches	sand	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: 7.8 Min: 6.1

Soil Map ID: 2

Soil Component Name: TIMOR

Soil Surface Texture: loamy sand

Hydrologic Group: Class A - High infiltration rates. Soils are deep, well drained to excessively drained sands and gravels.

Soil Drainage Class: Moderately well drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	14 inches	loamy sand	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	Not reported	Max: 0 Min: 0	Max: Min:
2	14 inches	55 inches	loamy sand	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	Not reported	Max: 0 Min: 0	Max: Min:
3	55 inches	59 inches	cemented	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	Not reported	Max: 0 Min: 0	Max: Min:

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005, 2010 and 2015 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory
Source: Department of Fish and Wildlife
Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

OTHER STATE DATABASE INFORMATION

Groundwater Ambient Monitoring & Assessment Program
State Water Resources Control Board
Telephone: 916-341-5577
The GAMA Program is Californias comprehensive groundwater quality monitoring program. GAMA collects data by testing the untreated, raw water in different types of wells for naturally-occurring and man-made chemicals. The GAMA data includes Domestic, Monitoring and Municipal well types from the following sources, Department of Water Resources, Department of Heath Services, EDF, Agricultural Lands, Lawrence Livermore National Laboratory, Department of Pesticide Regulation, United States Geological Survey, Groundwater Ambient Monitoring and Assessment Program and Local Groundwater Projects.

Water Well Database
Source: Department of Water Resources
Telephone: 916-651-9648

California Drinking Water Quality Database
Source: Department of Public Health
Telephone: 916-324-2319
The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

Geothermal Wells Listing
Department of Conservation
Telephone: 916-445-9686
Geothermal well means a well constructed to extract or return water to the ground after it has been used for heating or cooling purposes. Geothermal wells in California (except for wells on federal leases which are administered by the Bureau of Land Management) are permitted, drilled, operated, and permanently sealed and closed (plugged and abandoned) under requirements and procedures administered by the Geothermal Section of the Department of Conservations Geologic Energy Management Division (CalGEM, formerly DOGGR).

California Oil and Gas Well Locations
Source: Dept of Conservation, Geologic Energy Management Division
Telephone: 916-323-1779
Oil and Gas well locations in the state.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

California Earthquake Fault Lines
Source: California Division of Mines and Geology
The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

State Database: CA Radon
Source: Department of Public Health
Telephone: 916-210-8558
Radon Database for California

Area Radon Information
Source: USGS
Telephone: 703-356-4020
The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones
Source: EPA
Telephone: 703-356-4020
Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.
